French Left Swamps Foes In First Round of Election

By Jonathan Kandell nal Herald Tribune PARIS - The French left routed

lists - agreed to run a single can-didate in most legislative districts, conservative forces in Sunday's hoping to win a substantial numfirst electoral round, and seemed ber of seats during Sunday's round almost certain to gain an over-whelming majority of legislative seats in the runoff elections on and huild up momentum for the June 21 contests. But the leftist surge upset all center-right calculations. The con-June 21.

According to computer projec-tions on state television at 10:30 p.m. Paris time, the Socialists, Communists and other leftist candidates held a 55 percent to 44 percent lead over conservatives, with the ecologists getting about one percent.

The computer projections also suggested that the Socialists may emerge from next week's runoff elections with a majority of their own in the National Assembly, without even having to seek Communist support to push through their programs. According to state television estimates, Socialist candidates had scored about 38.5 percent, and could eventually win 300 or more of the 491 legislative seats.

The legislative race was thus shaping up as a stunning victory for the Socialist president, Fran-cois Mitterrand, who was voted into office last month and then immediately called for National Assembly elections in the hopes of achieving a parliamentary majority to push through his leftist econom-ic and political reforms.

Electoral Pact

Under the French election system, if no candidate gathers a majority of the votes in the first electoral round, the two leading votegetters usually face each other in a runolf.

tection for the queen and for

escalating this way," he said. Any police assault on an occupied building is the signal for squads of trained young people to fan out through the city, hurling stones and sometimes Molotov cocktails at offices and homes of Dutch businessmen and officials whom the squatters consider "speculators."

Extreme Leftists

To Dutch police and army specialists, the squatter movement is a vehicle for extreme leftists with contacts among Italian and West German terrorists who provide urban guerrilla training. Squatters and police en-gage in sophisticated duels of radio jamming to gain the advantage of surprise in demonstrations. To protect their messages from being constantly intercepted. Dutch police have bought a computer for rapid changes of radio codes and frequencies.

Squatter magazines list neighborhood committees that will help neophytes organize. Squatters have their own cafes, such as "The Golden Crowhar," operated by teenagers in Amsterdam's Jordaan area. In many cases, squatters, working with their hands, have distinctly improved the properties they have taken over.

Squatters claim that 20,000 people are illegally housed in Amsterdam, and that the

> The squatter movement is rooted in the scarcity of cheap, convenient housing. Because of this, the squatters enjoy widespread

sympathy. The problem has become acute because a new generation of Europeans, especially in the Netherlands, are leaving home much younger than their parents or their elder brothers and sisters did.

For students or working-class couples, the waiting time for subsidized accommodation has lengthened. As the baby boom generation matured in the early 1970s, young cou-ples had to wait until they were 27 years old to move out of their parents' homes.

Age Lowered

Despite the shortage, the Dutch parliament decided in 1977 to lower the age of eligibility for municipal-controlled housing to 18, to satisfy many young people's wish to live independently.

Within months, a squatter movement assumed proportions unseen since the postwar era when survivors scramhled for roofs in the rubble of European cities. For the "kroaken," as squatters are known in Dutch, it was open season on any empty space: All

Υ.

to establish residence under Dutch law. Water and electricity cannot be cut off to an occupied dwelling in the Netherlands.

The kroaken see themselves as liberators, freeing badly needed space from the grip of speculators, absentee landlords and bureaucrats.

To their critics, they are spoiled brats of the welfare state who seize property that they are ton impadent for the state to distribute.

'Gentrification'

But even property-owning Dutch people - many of whose children are sonatters, at least while completing high school and university - admit that the protesters have a cause

Nowhere is the problem more acute than in Amsterdam. The city, especially the center of town amid its tree-lined canals, is chronically short of housing. Yet many huildings stand empty because they belong to speculators waiting for price rises or because potential landlords are discouraged by reut controls and high taxes.

Besides the changes in family sociology, the movement was fueled by young people's resentment against the "gentrification" 0 formerly rundown city centers as upper-in-(Continued on Page 5, Col. 4)

Haig, in Peking, Stresses Shared Anti-Soviet Views

By Don Oberdorfer Washington Post Service

PEKING - Secretary of State Alexander M. Haig Jr. brought the Reagan administracion's anti-Sovi-et drive to Russia's bitterest foe Sunday, but the first Chinese reaction was restrained.

Mr. Haig, in a two-hour meeting with Chinese Foreign Minister Huang Hua, spoke of "Soviet he-gemonism" as the source of the world's woes. This was language and substance that have been articles of faith in Peking since the Sino-Soviet split two decades ago but which bave only intermittently been espoused by Washington administrations.

Instead of expressions of de-light, however, China's initial response was to emphasize continuing differences between Washington and Peking. The reason for the cautious posture, it was clear, was Chinese displeasure and uncertainty about the current sticking point in U.S.-Chinese relations, the

discourse. "Your statesmen have been warning of the dangers of aggres-sion for some time," declared Mr. Reagan approach to Taiwan. According to a U.S. participant who briefed reporters, no mention Haig in his hanquet toast, suggestof Taiwan was made by either side ing that the United States has when the two men met in the come around to a longstanding Chinese position. "You have long Great Hall of the People several hours after Mr. Haig's arrival at midday from Hong Kong. argued for concerted action to pre-

Interference Seen

The Chinese side is expected to get to the touchy subject Monday and Tuesday and to insist that continuing U.S. supply of arms to Taiwan, especially sophisticated arms such as jet aircraft, is a gross interference in Chinese internal affairs.

Mr. Huang, foreshadowing this position, called in a banquet toast Sunday night for U.S.-Chinese relations to move forward on the basis of "noninterference in each other's internal affairs."

The Chinese foreign minister's toast, the major public utterance by his side in this first of three days of talks, declared that "we attach importance to the strategic relationship between China and the United States."

He quickly went on, however, to say that China ano the United States differ in social system and ideology, "and there are quite a few differences between them in policy and viewpoint." Mr. Huang called for the differences to be handled "in a cautious and approdetail

6

first day.

Mr. Haig is to have further dis-

Begin Steps Up Criticism of U.S. And Assails Opponents at Home

By William Claiborne Washington Post Service

JERUSALEM - Israeli Prime Minister Menachem Begin on Sunday stepped up his counterattack against U.S. condemnation of the Israeli bombing of Iraq's nuclear reactor by sending a sharp rebuke to Defense Secretary Caspar W. Weinberger. Mr. Begin also warned his domestic political opponents that criticism of the raid encourages "all those who are plotting against us."

The prime minister did not release the text of the letter to Mr. Weinberger, but it was understood to say that Mr. Begin is hoping for greater understanding by the Reagan administration for Israel's security needs. Mr. Begin had accused the U.S. defense secretary on Thursday of demanding that the United States withhold from

said

Israel "all economic and military aid '

Mr. Weinberger denied making any such recommendation. Also, in a message prepared for a parade in New York by Israel's supporters on Sunday, Mr. Begin reiterated his contention that the bombing of the reactor was a legitimate act of self defense, and that it had to be done now because the reactor soon was to become "hot" and could not be destroyed later without inflicting heavy civilian

casualties in Baghdad. Aides to the prime minister stressed that Mr. Begin is not attempting to appeal to U.S. public opinion over the head of President Reagan, but that the Israeli leader had been asked to send a message to the New York gathering and that it was only natural to deal with a topical issue such as the controversy over the bombing raid.

green light to proceed with its acts of terrorism and piracy. "We ask ourselves for how long

will the United States continue to

arm Israel with advanced weapons,

No Mention of Embargo

expertise and technology?"

Mr. Begin also denounced the opposition Labor Party for allegedly creating "deliberately false propaganda which is being exploited by all those who are plotting

against us regarding the glorious operation of the Israel defense forces in demolishing the atomic reactor near Baghdad." In a communique issued by his Cabinet, Mr. Begin said that criticism of the raid's timing before the June 30 election by the Labor Party leader, Shimon Peres, has encouraged enemies of Israel to conclude that the attack was an elec-

tion ploy. No responsible opposition in a democratic nation has ever acted in such a manner." Mr. Begin declared. Spokesmen for the Labor Party

on Sunday repeated their charge that the timing of the bombing raid was politically motivated, and that Mr. Begin's sharp altacks on the United States were intended to

draw sympathetic popular support at home.

Meanwhile, the Foreign Minis-try acknowledged Sunday that a threat on Oct. 4 against Israel that Mr. Begin has repeatedly attribu-ted to Iraqi President Saddam Hussein to justify the bombing was without foundation. Mr. Begin on several occassions said that Mr. Hussein, in the Oct. 4 issue of the Baghdad daily, Al-Thawra, said: "The Iranian people should not fear the Iraqi nuclear reactor, which is not intended to be used

France Pledges to Help Fight Basque Violence MADRID --- French Foreign Minister Claude Cheysson has pledged that his country's new Socialist government to help Spain fight Basque separatist guerrilla violence. As well, he expressed support for Spain's

entry into the European Economic Community and NATO. After meeting Saturday with Spanish Premier Leopoido Calvo Sotelo. Mr. Cheysson told reporters that guerrilla violence was as intolerable to France as it was to Spain. "We shall fight it with all our means, you will see over the next few months." he added.

WORLD NEWS BRIEFS

Mr. Cheysson's overnight visil to Madrid appeared to ease the growing ill-feeling over the issue caused by apparent French unwillingness to extradite a suspected Basque guerrilla. Tomas Linaza Echevarria, accused of involvement in seven killings. Mr. Cheysson, however, said that no decision has been made on whether Mr. Linaza would be extradited since police were continuing to investigate whether he had committed any offence in France.

Pope Addresses Crowd at St. Peter's Square The Associated Press

VATICAN CITY - For the second time since the attempt on his life May 13. Pope John Paul II addressed a crowd in St. Peter's Square on Sunday. After a brief recorded address was played, the pope leaned out the window of his apartments overlooking the square and spokes in a clear voice.

"I want to greet all Romans and pilgrims and give the apostolic bless-ing to everybody who listens to me through the radio and television." the pope said in Italian. The, in a "special word" to a group of his country-men in the square, he said in Polish: "I am with you. I bless you."

On Saturday, Vatican Radio said. "Exactly a month from the attack, the general condition of the pope continues to improve... and he is slowly returning to his normal lifestyle."

Survivors of Holocaust Gather in Jerusalem

JERUSALEM - About 6,000 people from 23 countries have arrived in Israel for the first world gathering of Jewish survivors of Nazi concen-tration camps, the organizers of the gathering said Sunday. About 3,000 Israelis and 800 children of survivors will also take part

in the four-day gathering, which begins Monday in Jerusalem, said Ernest Michel, the chairman of the organizing committee.

Jerusalem's convention center has been named "Survivor Village" for the occasion. The gathering will end with a procession to the Western Wall, where the survivors will light 6,000 candles for the 6 million Jews who died in the Nazi extermination campaign.

2 Frenchmen Are Missing in Atlantic Air Race

PARIS - A Piper Commanche light aircraft flown by two Frenchmen was reported missing after taking part in an international race from Paris to New York and back, organizers of the race said on Sunday.

The plane, flown by Jean Masserot and Olivier Recoing, took off last weekend with 65 other competitors. "It has been missing since last Thesday and is believed lost in the Atlantic," a race official said. The race

Arafat Seeking to Mediate Conflict in Sahara The Associated Press

ALGIERS --- Palestine Liberation Organization leader Yasser Arafat was scheduled to return to Algiers Sunday from Rabat, Morocco, where he met briefly with King Hassan II in an apparent effort to mediate the conflict in the western Sahara on the eve of the annual summit meeting of the Organization of African Unity in Kenya.

Mr. Arafat met with Algerian President Chadli Benjedid on Saturday and then flew to Rabat. After the meeting in Algeria, Mr. Arafat said the discussions were to solve problems existing between Arab and Islamic countries in order to face the Ziooist danger. Tripoli's radio station said Libyan leader Col. Moamer Qadhaff has

sent Mr. Arafat on an inter-Islamic mission to discuss the Iran-Iraq war and the war in the western Sahara. The radio said Mr. Arafat also would go to Saudi Arabia, Tehran and Bagdad.

The conservatives argued throughout the campaign that # center-right legislative majority would keep in rein the more radical aspects of President Mitterrand's government program."

But the left insisted that such a situation --- unprecedented in the 23 years of the Fifth Republic would lead to clashes between the egislative and execusive branches, and a return to the unstable, revolving-door Cabinets and frequent parliamentary elections of the Fourth Republic.

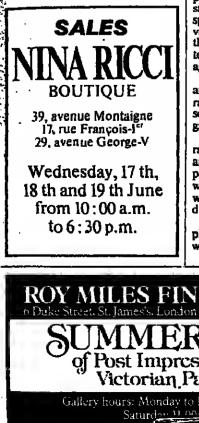

Political analysts were uncertain just why the turnout was so low among the 36 million voters. Some suggested that many voters were weary after long months of political campaigns going back to the recent presidential election. Others noted that there were widespread expectations that the left would win, so many conservative stayed home. And a Jew commentators, pointed out that that the weather. was warm and sunny, and that the fishing season opened over the up might emerge in the National weekend.

White House to Push Saudi Arms Deal

By Rudy Abramson Las Angeles Times Service

WASHINGTON - The Reagan administration will launch an ef-fort immediately after the July 4 air raid on an Iragi nuclear reactor congressional recess to persuade skeptical lawmakers to accept its plan to sell five sophisticated Air-borne Warning and Control Sys-tem (AWACS) planes to Saudi Arabia.

Bitterly opposed by Israel, the arms package has been delayed be-cause of the impending Israeli elecjuons on June 30. It has been fur--ther delayed because the Senate Republican leader, Howard H. Baker Jr. of Tennessee, had. warned the White House that Congress might reject the sale, which also includes P-16 fighter planes.

Sources said that White House tions with Congress concerning the Saudi arms package. The agree-ment will be formally presented in

officials and Sen. Baker concluded

in meetings last week that Israel's

House and Senate members return June 7 and the ensuing controversy had not damaged the prospects of getting the AWACS deal through Congress. A senior White House official

said Saturday that Israel's attack on the outskirts of Baghdad may enable the administration to make stronger argument for the AWACS sale. This would be so especially if the United States takes no action against Israel beyond the delay announced last week in delivery of four new F-16s to the Israeli Air Force.

Raid's Effect

The administration would be in position to argue that since no strong measures were taken in re-sponse to Israel's use of U.S.-provided planes in the Iraqi air raid, then Israel should abandon its intensive lobbying in Washington against the Saudi sale.

Some administration officials are said to believe that the Israeli raid may already have moderated sentiment against the sale in Con-

Though investigation of the Israeli raid is still not completed, and congressional hearings are expected this week, there is already widespread speculation that the whole matter will be allowed to drop. According to While House

plans, the last three weeks of July will be used for informal consulta-

from their August recess. The administration's strategy is not firmly set, sources said Saturday, because of the continuing discussions of the Israeli raid, and the questions of what Arab countries might yet do in retaliation. But a

early September, immediately after

State Department official observed last week that Arab reaction to the air strike had been generally modcrate. The White House official interviewed Saturday said the fact that

the Israeli planes were not detected as they crossed the northern fringe of Saudi Arabia on the way to and from Iraq may ease some of the Israeli fears about the importance of AWACS planes in Saudi

possession. At the height of the Iraqi-Iranian war, the United States dispatched four AWACS planes -modified Boeing 707s with buge radomes mounted above the fuselage - to Saudi Arabia. They are still there to guard against any air strikes against Saudi territory from the Gulf.

Many senators considered it virtually certain that the Saudi arms proposal would have been rejected by Congress if it had been pressed earlier this year. Some even specu-lated that the delay in submitting it to Congress might have been a step toward letting it die quietly.

Another reason for the postponement, in addition to the Israe-

i elections and the stiff congressional opposition, was that the administration did not want a major foreign policy confrontation to distract attention from Mr. Reagan's economic program.

Assembly Ban in India The Associated Press

Ethiopian Jets

MOGADISHU, Somalia Ethiopian fighters have bombed two provincial capitals in central Somalia, killing 30 persons and injuring 53, government officials said

The air raids have forced Somali, President Siad Barre to cancel a visit to Egypt and a scheduled meeting Sunday with President Anwar Sadat, the Cairo newspaper Al-Ahram reported.

The Somalian government said 24 persons were killed and 37 injured Friday at Galcaio, 50 kilometers (31 miles) from the Ethiopian border. Six persons were killed and 16 injured in a bombing raid Saturday on Dusa Mareb, 150 kilometers south of Galcaio, it said.

The attacks raised the death toll to 42 persons in sever raids last week on Somalia towns and villages near the border with Ethiopia's disputed Ogaden region, officials said. Ethiopia and Somalia fought a war in 1977-78 over control of the Ogaden.

Journalists who visited two of the villages bombed last week were told by military authorities that the attacks could have been in retaliation for recent attacks inside the Ogaden by Western Somalia Liberation Front guerrillas.

Democrats, GOP Reverse Roles on Tax Issues By Art Pine -

The Associated Press

WASHINGTON - A few years ago, when the economy was more buoyant and liberals were still riding high, it was easy to tell the Democrats from the Republicans on tax issues.

Most Democrats had a simple creed: tax relief should go mainly to low- and middleincome households at the expense of the well-to-do. Business tax cuts were "giveaways" and Congress, in the name of reform. ought to close those "loopholes" that benefited the rich.

Republicans, on the other hand, wanted tax cuts skewed to help high-income inves-tors, more tax cuts for business, an end to mounting budget deficits and "loopholes" left intact. Only a few Democrats -- all conservative Southerners — went along. Today, however, as the House Ways and

developments

gress.

Means Committee moves into mark-up on a new tax-cut bill, the Democrats are much more conservative and the tax stances of the two major parties have shifted sufficiently to make old hands do a double-take.

The Democrats are still pushing a plan that would do more for those in the lower brackets than would the Republicans' tax package. But the Democratic alternative also contains so many breaks for savings and investment it is virtually a clone of the GOP proposals of a few years ago.

means little.

dog.

criteria.

The Democrats are now proposing slashing the maximum rate on investment income from 70 percent to 50 percent; cutting estate and gift taxes, increasing savings incentives and write-offs on interest income, and even cutting capital gains taxes.

At the same time. Republicans are press-ing for large tax cuts that would send the budget deficit soaring — a strategy they are fond of comparing to the tax reductions pushed through by former President John F. Kennedy in 1962.

Meanwhile, almost nobody is talking about loophole-closing or tax reform. Said Rep. James C. Wright Jr., the Texas

Democrat and majority leader, in a televi-sion interview recently, "One man's loop-hole is another man's legitimate benefit." Not long ago, that was the sort of thing only Republicans used to say.

Although Democrats and Republicans are still, scrapping, the terms of debate have shifted so sharply that by historical stand-ards the Republicans effectively will have won the battle even if they "lose" the current debate.

Indeed, the Reagan administration thinks so much of the Democrats' proposals it had planned to incorporate them in a second tax-cut bill later on. Now it has included them in the president's new "bipartisan compromise" bill.

"System Has Moved"

"It used to be that these kinds of things were only being advocated by rednecks and Republicans," said Rep. Kenneth L. Hol-land, a South Carolina Democrat and longtime Ways and Means Committee member. To Rep. Barber B. Conable, the New Yorker who is the committee's ranking Republican, the shift was almost inevitable: "It's obvious that what we were doing be-fore just wasn't working. The whole Ameri-

can political system has moved." What made the Democrats swing so far to

according to Rep. Sam M. Gibbons, Demo-crat of Florida, who is on the Joint Committee on Taxation, was one of the early "tax reformers" on the Ways and Means Committee and now has turned more conservative himself. Specifically, Rep. Gibbons has referred to the impact of the price spiral in making the middle class feel more pinched -and less charitable - on questions of tax-**CS**.

In the early 1960s, when inflation still was mild, people were in a charitable mood. Tilting tax breaks to the poor was easy enough for Congress to do.

Democrats Depart

With soaring inflation, however, people have been earning more than they ever dreamed, but enjoying it less - making them far less inclined to sacrifice their tax relief to the poor.

Experts also cite these influences:

 The recent round of business slumps, particularly in autos and steel, which has scared blue-collar workers and made them more willing to support business tax incen-tives that ultimately could mean more jobs.

 The defeat — or retirement — of many older-line Democrats who provided the majority for previous tax cuts.

• The emergence of an effective business lobby that has been able to unite on key tax issues, enabling it to push faster depreciation write-offs and other corporate cuts successfully. Democrats and Republicans are now falling all over each other to sponsor pro-business tax cuts. Even liberals on the Ways and Means Committee have a business tax-cut plan.

• The zeal of "tax reformers" -- both in ending it came from restaurant Inflation is the major cause of the change, the last major "reform" bill, in 1976, and in feared it would cost them jobs.

estimates.

former President Jimmy Carter's ill-fated 1978 tax-revision proposal - which finally cloyed and helped take the momentum out of loophole-closing. The high-point of the "tax reform" move-

ment came in 1976, when Congress passed a bill that seemed an embodiment of liberals' dreams. The measure contained more than 200 separate "loophole-closings," shut down dozens of longstanding tax shelters, put new restrictions on use of the foreign tax credit and cut back tax breaks for Americans working abroad.

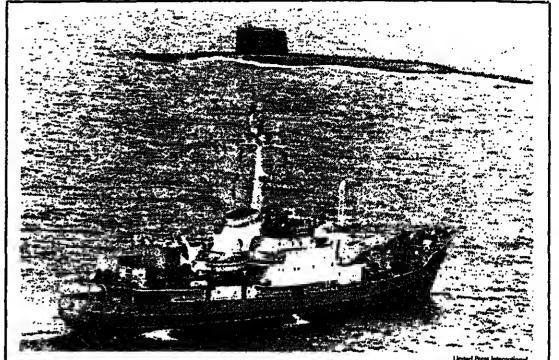

It also raised taxes of those who sell inherited property for profit, toughened the tax treatment of capital gains and trimmed back some of the tax breaks then given large farms.

No Free Martini Lunch

But many of the provisions only led to heightened opposition. The tax increase on Americans working abroad, for example, left U.S. construction firms claiming they could not compete with foreigners because of increased costs. The cause of "fax reform" may also have

been set back by the complex overhaul plan Mr. Carter sent to Congress in 1978 - a plan so unrealistic in some respects that many feel that it made tax revision look silly. A prime example was Mr. Carter's loudly proclaimed demand that Congress cut hack the longstanding deduction for husiness en-tertainment — the "three martini lunch" —

Although the president asserted repeatedly that the deduction was a sop for corporate executives, the biggest opposition to ending it came from restaurant workers who

gressional Record and interpreta-tions by administrative agencies. The losers, in a 24-page dissent by Associate Justice William H. Rehnquist, produced footnotes to much of the same material and accused the majority of ignoring traditional canons of statutory construction and relevant legislative history.

Suit by Jall Matrons

The case, in which jail matrons sued a county for paying them less than male deputy sheriffs who did similar work at the same jail, is thus a fitting example of how the court approaches its mind-reading task. More than a third of the decisions this term require the justices to begin by figuring out what Congress meant.

Decisions interpreting statutes are frequently unpersnasive. Worse, some legal scholars contend, the rulings find the court using construction to put an intellectually respectable gloss on deci-sions that are basically arbitrary. Indeed, Associate Justice Robert H. Jackson, in a 1953 opinion, called decisions based on legislative history and intent a weird endeavor that seems not interpretation of a statute but creation of a statute.

The canons of construction to which Mr. Rehnquist referred last week are essentially common-sense guidelines whose frequent citation in Latin lends them an air of principle. In pari materia, for example, means that when a court interprets one law in light of another, it been schieved. should not regard a generally worded statute as nullifying one that specifically addresses a particular issue

Several such maxims are contradictory, leaving judges free to choose one that best suits their purpose.

The justices have apparently found counsel in Sir Arthur Conan Doyle's mystery "The Silver Blaze," Writing for the court last year in a case involving challenges to federal environmental regulations, Associate Justice Potter Stewart said that in ascertaining a statute's meaning, the court cannot, in the manner of Sherlock Holmes, pursue the theory of the dog that did not bark. He meant that the court should not draw conclusions from what Congress fails to say.

Two weeks later, Associate Justice John Paul Stevens drew the opposite lesson. In a concurring opinion on a criminal matter, he

WHEN YOU TELL'EM BACK HOME HOW YOU "REINED" IN IRELAND, SAVE SOME IRISH POUNDS ON THE CALL.

The Irish have a way of making you feel like a queen. They put you up in one of their ancient castles. Invite you to lavish medieval banquets at night. And show you the most beautiful countryside in the world by day-in a jaunting cart, no less (with you holding the reins). But before you share it all with the folks back home, check out these pound-saving tips.

SAVE ON SURCHARGES

Many hotels outside the U.S. charge exorbitant surcharge fees on international calls. And sometimes the fees are greater than the cost of the call itself. But if your hotel has TELEPLAN, the way to keep hotel

surcharges reasonable, go ahead and call. No Teleplan? Read on! There are other ways to save.

SAVE WITH A SHORTLE

In most countries there's no threeminute minimum on self-dialed calls. So if your hotel offers International Dialing from your room, place a short call home and have them call you back. The surcharge on short calls is low. And you pay for the callback from the States with dollars, not local currency, when you get your next home or office phone bill.

SAVE THESE OTHER WAYS

Telephone Company credit card and collect calls may be placed in many

countries. And where they are, the hotel surcharges on such calls are usually low. Or, you can avoid surcharges altogether by calling from the post office or from other telephone centers.

SAVE NIGHTS & WEEKENDS

Always check to see whether the country you're in has lower rates at night and on weekends. Usually the savings are considerable.

You'll save a lot of green when you follow these tips. And a lot of gas when you travel by jaunting cart.

Reach out and touch someone

Why Arm Either China?

Secretary Haig's visit to Peking is not just your ordinary diplomatic foray. It signifies that even the most conservative of recent presidents now accepts the strategic value of doing business with a country he used to dismiss as Marxist and godless. A lot of right-wing dogma has been silently interred as President Reagan "normalizes" ties with China. But those ties may yet be unglued by campaign promise to upgrade American relations somehow with Taiwan.

The key to opening relations with Peking. was agreement that there exists only one China, with the tacit understanding that Peking would not use force to retake Taiwan. Since Taiwan also insists it speaks for one China, for the United States to accept that locution was well worth the historic breakthrough.

So Reagan wisely retreated from a careless statement that he "guessed" he favored offi-cial relations with Taiwan. There is no more talk about undoing the Taiwan Relations Act of 1979, which puts American diplomacy on an "unofficial" basis. The president's loyalty to Taiwan has taken a different form weaponry. From its start, his administration gave its encouragement to a Taiwanese purchase of the highly advanced FX fighter plane, far superior to anything Peking has. Taiwan doesn't need such planes - but they would betoken Reagan's sincerity.

China's leaders view the deal as an affront,

even a humiliation. Haig can doubtless argue that as a matter of right, China has no veto over arms sales to Tarwan. He can point out that Washington is willing to lift archaic curbs on the export of technology to China - indeed, that the administration proposes that China get the same trading status as Yugoslavia. That would give Peking the right to buy weapons, subject to case-by-case review.

But the Chinese are aware that even the Pentagon now questions whether it is worth angering Peking to mollify Taipei. China has, in any case, made a further concession to Taiwanese anxiety by softening its objections to existing American sales to Taiwan, running about \$800 million a year.

Reagan may believe that China will go only so far in protesting the FX deal because it has invested too heavily in its American connection, because it fears the Russians too much and because China wants American weapons. But suppose that this hard calculation is correct. Does Washington really want to become a supplier of sophisticated weaponry to China OR Taiwan? There may be reason to supply China with low-level military technology, but to jump upward would unnecessarily provoke the Soviet Union.

The case appears overwhelming for deferring the planes for Taiwan - and for moving slowly on any weapons for Peking. THE NEW YORK TIMES.

A Serious Twist to a Serious Issue

By James Reston

WASHINGTON - For over a generation, the control of nuclear weapons has been recognized as the most important question be-fore the human family. If they cannot be con-trolled and their apocalyptic power is used to settle the unavoidable disputes between nations, then none of the other questions - of hunger and ideology and a livable world can be resolved.

On this point, there is general agreement. All the nations, regardless of their political convictions, are also agreed on three other propositions: that in a world of limited gas and oil, nuclear power is the most promising source of energy in the coming century; that its development is highly dangerous; that, even so, it will be developed, for peaceful purposes, and in the process will make possible the production of nuclear weapons.

As Sen. John Glenn has recently pointed ont, the potential from the platonium to be extracted at the 247 "peaceful" nuclear power reactors now operating in the world is between 4,000 and 8,000 nuclear bombs per year.

That, of course, is assuming the worst. But while there is general agreement about the danger and the need for both development and control of nuclear energy, there is no agree-ment about the means to resolve this dilemma.

Many serious people have tried. We have had the Baruch plan, the Lilienthal plan, the Oppenheimer plan, the Acheson plan - all designed to ban the development of atomic weapons, all rejected by the Soviet Union. And now we have the Begin plan: Bomb the nuclear plants of any potential enemy you suspect of developing atomic weapons that may threaten your security.

It's easy to understand Begin's anxiety: Iraq has a government of thugs, committed to Isra-

el's destruction. But it can't even win an un-provoked war against a divided Iran, let alone challenge Israel's superior intelligence and military power. And it wasn't even clear to the nuclear nonproliferation treaty officials in Vienna who inspected the Iraq nuclear facility that it was being transformed into an atom

bomb factory. Nevertheless, the Begin government, which does not necessarily reflect the opinion of the Israeli people, defied all its United Nations treaty commitments against the use of military force, embarrassed its one ally in the Arab world and forgot that America's enduring nightmare is the Japanese sneak attack on Pearl Harbor.

Sorting Out the Wreckage

Begin had asked for a meeting with Presi-dent Sadat to compose the violence in the Middle East and then, without telling him in advance, ordered the attack on Iraq. He had pretended to support the Reagan efforts to have Ambassador Habib work out a compromise in the Lebanese war, and then made it impossible by his preventive strike outside

Baghdad, The Reagan administration is now trying to sort out the wreckage. For President Reagan, it is obviously an irritation and a puzzle. He had been trying to put together a defense against Soviet penetration in the Middle East, to encourage moderate Arabs to help him in this endeavor, to persuade the European allies that he could restrain the Israelis and keep them in line by means of Washington's pro-Israeli poli-cies — and at the same time to focus attention of the free world on what may very well be the really major threat of Moscow's intervention in Poland

All these objectives are now in jeopardy.

Another Unesco Round on News Freedom

By Philip H. Power

Reagan, with his secretary of state in China reagan, which his secretary of state in China and his undersecretary in South Africa, has been dealing with these developments in his own accustomed and amiable way — which on atomic questions is no longer regarded by his allies as very amusing.

He invited the Arab ambassadors to the White House and told them that maybe the Israelis had gone too far. He invited the Israeli ambassador to the White House and told him that while he regretted having to "suspend"

the delivery of four F-16 fighter bombers to Israel, there would be no fundamental change in his commitment to the U.S.-Israeli alliance. That is Reagan's way. He wants everybody to stop fussing and be "reasonable." As an old sports broadcaster, he undoubtedly wants the major leagues to "play ball." But the control of nuclear weapons is no

joking matter, a fact dramatized by Begin's latest outrage. He has asked the nations to agree that Israel be allowed to have atomic weapons, but has bombed his enemy for attempting to have the same; he feels that the United States is "unfair" if it condemns him and withholds more fighter bombers, to be used as he pleases. It is not an attractive proposition to most obvers in Washington,

Reagan's reaction, which is more important, has been mildly disapproving. He doesn't go so far as to say, as he did during his presidential campaign, that nuclear proliferation is "none of our business." (He later retracted that stand.) But the control of these weapons is now clearly the presiding issue of world politics, and even his best friends are beginning his wonder whether he is a serious man who understands the seriousness of the problem Menachem Begin has put before him.

C1981, The New York Times.

Japanese Attitude **Evolves**

By Ken Ishii

OKYO -- Now that the dust is settling from the aproar over the disclosure that nuclear-armed U.S. warships have been calling at Japanese ports, one cannot help wonder whether the Japanese nuclear allergy is as severe as it used to be when memories of Hiroshima and Nagasaki were fresher.

Two Cabinet ministers who commented on the remarks by Harvard's Prof. Edwin O. Reischaper that triggered the fuss refused to rule out the possibility that Japan may have to approve transit visits by nuclear-armed U.S. ships in the future. One was Ichiro Nakagawa, director-general of the Science and Technology Agency. The other was Labor Min ister Masayuki Fujio.

More significant perhaps was the public reaction, or lack thereof, to the arrival of the U.S. carrier-Midway at its home port of Yokosaka, near Tokyo, on June 5.

The Japanese press, which had followed the progress of the Mid-way with daily reports from the time it left the Philippines, marshaled available resources at Yokosuka for blanket coverage of an expected climactic expression of public protest. By now everyone was certain the carrier carried a nuclear arsenal

¥80

Lefust unions and anti-nuclear groups gathered to demonstrate, but they were only a fraction of the crowds that turned out in the 1960 demonstrations against the U.S.-Japanese security treaty. The Yokosuka demonstration was a media letdown.

Prior Consultation

The reason for opposing the car rier's arrival — and the reason for the flap generated by Mr. Reis-chauer, a former ambassador to Japan, when he stated that nuclear-armed U.S. warships have been visiting Japan for years — is that it violates the Japanese government's rule not to allow the presence of nuclear weapons without prior consultation between Washington

and Tokyo. But the uproar was generated largely by the powerful Japanese press — along with the left, which saw an opportunity to discredit Premier Zenko Suzuki.

Japanese leaders have always known that if Japan is to rely on the U.S. nuclear umbrella, U.S. nuclear-armed vessels must be allowed access to Japanese ports, and that such ships cannot tempo-rarily unload their weapons in mid-ocean. But they have been unwilling to face the facts publicly. With the United States maintaining a policy of refusing commenton whether its warships are made ar-armed. Tokyo has found it easy

to hide from reality. Even now, the government adheres to its interpretation that refusing to permit the introduction : of nuclear weapons means refusing to allow ships carrying them to River stop temporarily in Japan, and that, since prior consultation has not been sought, nuclear weapous are not being carried.

This is a pattern of logic pecu-liar to the Japanese that Kiyoaki

Murata, editor of the Japan Times,

pointed out in a recent article. The

Japanese adopt two positions on

any issue. One is talemae, or the

posture one takes for public ac-

ceptance. The other is hon-ne, liter-

Reagan and the Mideast

President Reagan faced a dilemma in his initial response to the Israeli raid in Iraq. He recognized a need to distance the United States from the raid and to show that he does not have an anything-goes indulgence of Is-rael. But he saw good reason not to call the basic American attitude toward Israel into question. Mr. Reagan met both requirements. He condemned the raid, made plain that Israel had violated the arms-sales law and suspended for a while the delivery of four new warplanes of the type used in the raid. (To have delivered those planes on schedule, a few days after the attack, would have been lunatic.) But he did nothing to alter the United States' continuing role as Israel's sole foreign source of arms.

Menachem Begin has been relatively subdued. On the eve of an election, he is evidently disinclined to advertise to his electorate that he has damaged his line to a new American administration and that the raid provoked Reagan to set what Israelis regard as the extremely troubling precedent of imped-ing the arms flow for political reasons. Begin did, however, allow himself to make an invidious distinction between the secretary of defense, whom he accused of recommending an arms cutoff, and "our friend" the secretary of state. This was petty and wrongheaded.

In another context, the general Arab reaction has also been relatively subdued. Some el's military superiority and the world oil glut, part by Reagan's prompt and forthright response and part by Arab relief at having Iraq disarmed. Rejecting whatever contribution American diplomacy may yet make in Lebanon, moreover, would serve no useful Arab purpose.

Any effort to turn up the heat at the United Nations will run counter to the administration's proper distaste for submitting im-portant Mideast matters to a forum long ago discredited on Mideast issues. It will be interesting to see, by the way, whether the United Nations will feel any embarrassment at taking up Iraq's complaint of Israeli aggression, even while Iraq continues its eight-month-old invasion of Iran.

The absence of an immediate Arab convulsion, however, cannot become an excuse for business as usual - unless the United States wishes to send the message that it cannot be reached by anything short of a convulsion. Iraq, Libya, some Palestinians and a few others aside, the Arab purpose is less to rail against Israel for this or that than to deepen the American commitment to easing the Palestinian issue so that the area can concentrate on more enduring problems of security and development, Mr. Reagan told the Arab ambassadors on Thursday that "the only answer in the Middle East is to achieve a true To mat end, and not simply for the establishment of an anti-Soviet military belt, his policy must now be shaped.

angry things have been said, but - knock on wood - there are no signs of military or economic reprisals against Israel or the United States. Part of this can be explained by Isra-

THE WASHINGTON POST.

A Late-Inning Hassle

The first inning in the baseball strike that began Friday was played 94 years ago when the Metropolitan Exhibition Co. invented what became known as the "reserve clause." The clause bound professional baseball players for life to the team with which they first signed a contract. As long as the clause existed, a player could perform only for the team that "owned" his contract, and that contract could be traded by the player's owner at will.

Organized baseball has come a long way and the reserve clause is gone, but its memory lingers on. The way the men who own the big teams tell it, this strike is baseball's ninth inning. Without the re-establishment of some remnant of the reserve clause, they contend, the nation's oldest big-time sport will price itself out of the market and become extinct.

The issue in the strike that has shut down the ball parks is what should happen if a star plays out his contract, declares himself a 'free agent" and signs a contract with a second team. In most business, nothing would follow if similar events were to take place. But in baseball, due to the reserve clause heritage, the owner who lost this player would be entitled to "compensation" from the owner who hired him. The strike concerns what form this compensation should take.

But it seems to us that this strike comes down to two simple questions: Should the players help the owners establish a system designed to protect each owner from the greed of his fellow owners? Is baseball really so different from other big businesses that all those who participate in it need to adopt a grandson of the reserve clause so it can function without absurdly high ticket prices?

THE WASHINGTON POST.

International Opinion

Message From the Mist

Out of the mist of the Republic of Ireland's election results, one fact stands clear: that Provisional IRA men did at least twice as well as precedent or prediction suggested. Conducting absentce candidatures from within the Maze prison in the North, and pressing an issue which the main parties were not, they collected as much as a tenth of the vote in the nine seats they contested; and under the republic's system of proportional representation in multi-member seats, that allowed two of their number to be elected to the Dail.

The island's political geography is chang-ing. The portent of the Fermanagh and South Tyrone by-election in April is confirmed. On both sides of the border there is a new readiness to vote for militant republicanism. And this is not altogether as depressing as it looks. It reminds both Dublin and London that they share a problem; it brings a degree of clarity and honesty into a dispute which has been short of both; and it offers the Provisional IRA an inducement to consider again the attraction of democratic as against terrorist methods.

- From The Sunday Times (London).

In the International Edition

Seventy-Five Years Ago June 15, 1906

PARIS --- For the first time in the history of the French parliament, the Socialist policy has been discussed - by Socialists, it is true - in the light of practical politics. M. Jcan Jaures, leader of the United Socialist Party, which won several seats at the recent elections, has intervened in the debate on the general policy of the Cabinet and has definitely indicated the aims and intentions of himself and, his friends. The principal method he proposes is the expropriation of all capitalists, in other words, of all who possess. The Socialist leader added that his fellow Socialists are not agreed as to whether this expropriation is to carry with it an indemnity for those who would be expropriated.

Fifty Years Ago June 15, 1931

BOSTON - Governor Franklin D. Roosevelt of New York, leaving for his home today after a brief visit here, carried with him the assurances of Massachusetts' Democratic leaders that the state's delegation to the Democratic national convention next year will support him unreservedly as the party's nominee for president. The demonstration in behalf of the New York executive immediately had its political repercussions. In the opinion of political leaders here, the Roosevelt-for-president campaign is openly under way. The lid is off, they declare, despite Mr. Roosevelt's avowal that he intends to continue to devote himself to running New York state instead of running for president.

Healthy Hardship?

I would like to comment on a letter from Chris Foster (IHT, May 18), the periodic fulminations of George Will on behalf of the rich and privileged, and the general edi-torial bias of the Herald Tribune in favor of its overindulged expatriate readership.

It seems to be the fashion these days to make propaganda for the right, as if those currently in power needed some moral justification for their plainly immoral policies. If we say, in effect, hardship and poverty breed "character," we can satisfy ourselves that the money withheld from some welfare mother or cripple is going to a good cause. Cashing our tax rebate in on a diamond or solid Swiss francs, we can justify the extravagance: Not only are we helping the economy but reinvesting in "production" (i.e., we're putting those lazy South African miners back to work, and getting those idle underpaid Swiss bankers on their feet again), but we're also aiding the indigent by giving them a sense of self-esteem.

The same holds true of America's shameful foreign policy. Mrs. Kirkpatrick calls Latin American Nazis our "friends." labels them "authoritarian" instead of fascist, and we all sleep better at night, firmly deluded that in addition to might we also have righteousness on our side.

DORIE BAKER . Lucerne, Switzerland.

Vain Warnings

All Turkish people were deeply saddened by the assassination attempt on the pope by a Turkish citizen. But world public opinion should consider that the would-be assassin had been sentenced to death in Turkey for murdering Turkey's leading journalist and democratic leftist intellectual, Abdi lpekci. Turkish security authorities definitely warned all the London.

T.

means of developing countries in order to increase their indigenous capacity for production and distribution of messages."

On Monday the 35-nation council will start translating into practice the basic 1PDC agreement laboriously worked out first at the Unesco meeting in Paris last April and again at the general confer-ence in Belgrade last fall.

This may prove a tough task. On a vital point - the way the IPDC council will make decisions - the working papers produced by the Unesco secretariat differ markedly from previous understandings.

A key Western goal in the 1980 negotiations was to make sure the intergovernmental council would

tioned. European security organizations and four times made extradition requests to West Germany, where the would-be assassin of the pope

spent a considerable amount of time after his escape from Turkey. Many Turks believe that West Germany did not give the required importance to the extradition requests of the Turkish government. Moreover, Italian police were warned by the Turkish authorities just one week before the assassina-

qualified. Mr. Mitterrand's statement is promising as it is, and your addition to it confuses the issue.

Jordan

Polish Difference

However attractive it might ap-pear, the "Finlandization" of Poland cannot be seriously posited (IHT. June 1).

If the one boundary along which the Soviet Union feels secure is the frontier with Finland, this is due not to the stability of the Helsinki government but to the presence of neutral Sweden to the west as the sine qua non of Finnish independ-

tinized skeptically, if not cynically. ROBERT McGEEHAN.

dom and proponents of governact by consensus, thereby providing a sort of veto against proposals from a Third World majority which might damage press freedom or stray from the practical into the ideological. Because help for developing countries via the IPDC would come mainly from developed countries, the negotiated formulation -- "in [the council's] deliberations, priority should be given to seeking consensus" seemed a fair way to balance the interests of all.

A Basic Rule

However, IPDC draft Rule 25 as prepared by the Unesco secretariat states: "Unless otherwise provided in these rules, decisions shall be taken by a majority of members present and voting." Nowhere in the proposed rules is the notion of decision by consensus men-

Just why the Unesco secretariat chose to propose a basic rule for the IPDC which ignores the result of two prior and very precise negotiations is not clear.

A possible explanation -- confu-takes into consideration the administrative chaos now rife at Unesco

United States and other developed countries are simply being diddled

volving Unesco and the press of-fers indirect support for the latter view. Thia was a bungled attempt by Unesco in February to hold a meeting on ways to protect journalists on dangerous assignments. Initially excluded from the meeting and then outraged at a working paper that called for Unesco to license those journalists who were to be protected. Western news dele-

to defuse the continuing conflict between advocates of press free-

ment control by providing practical, non-ideological ways to help developing countries wishing to improve communications systems. Regrettably, the past thrash over the IPDC has led some people to regard it as fittle more than another step in a systematic plan to aggrandize Unesco power and attack what remains of press freedom in the Third World. If this fear should turn out to be justified. some Western governments would. have little choice but to find other

ways to assist developing countries without sacrificing freedom of the press in the process.

take the casy route and drop out of Unesco. Most people who have watched the organization at work are convinced this would be self-defeating. Much better, they say, to stay in, fight, and try to exercise leadership.

No Fighter

This is not easy just now, particularly for the United States, which has had no ambassador at Unesco since November. The temptation to use the post as a payoff for po-litical friends must be strong for an administration that already holds Unesco in low regard.

But the importance of the press freedom issue and the demands of the job argue for an appointce with great knowledge, high political skills and enormous tenacity. With another round in the battle for press freedom opening Monday, it seems hard to win a fight in Paris blind eye to stops at ports authors. ized under the security treaty. without a fighter in the ring.

Those who remember Hiroshima and Nagasaki are being replaced by a younger generation. The concern expressed over nuclear weapons today concerns the weapons themselves and also the prospect of being involved in anfor assault because of a U.S. nuclear presence, or of being dragged into an attack made from Japanese bases.

Yet even Japanese who once. dreamed of unarmed neutrality. now feel that they cannot afford to lose the U.S. nuclear umbrella.

Indian Point last October, two in-spectors were to have been on duty, but the congressional report noted that one was a new arrival who was away during the week and the other had left the site for the day. The Consolidated Edison which operates the plant, about 35 miles (56 kilometers) north of midtown Manhattan on Hudson River, was fined \$210,000 by the commission.

completed.

'Not Enough People'

Rep. Moffett, speaking of the Con Erison episode and other in-cidents, said, "We are not saying that anyone is evil, but that there are not enough people."

The problem, he said, was made more complicated by both an intended speedup in the licensing of new nuclear plants and restrictions on new hirings that had been im-posed earlier this year before being modified. In its report, the committee said: "While it is conceivable that

the industry is being safely operat-ed, the plain truth is that the Nuclear Regulatory Commission inspection program is not now capable of ascertaining that fact one way or another. The NRC's routine, basic in-

position we propose will depend on the formation of the new gov-ernment," party leader Enrico Ber-linguer said at a rally in Sicily.

Meanwhile, a judicial committee has found that the Masonic lodge Propaganda Due, or P-2, which was at the center of the scandal that brought down the last government, "presented characteristics of a secret society" and thus might be unconstitutional.

The committee issued a state-ment Saturday advising that be-cause of the complexity of the law, the Parliament should decide whether P-2 came within the constitutional ban on secret societies. Mr. Spadolini, who has urged the dissolution of P-2, said the committee's findings matched his views. Political sources said Mr. Spadolini's political program would include a draft law clarifying the constitutional ruling and declaring P-2 illegal, as the com-mittee advised.

Last month almost 1,000 prominent Italians were named in a list of alleged members of the Masonic lodge, which, along with its fugi-tive grand master, Licio Gelli, is being investigated for criminal activities. The scandal has involved government ministers, military leaders and the heads of the secret

Group Urges Bonn To Reverse Policy On NATO Missiles

The Associated Press

BONN - A coalition of leading leftist politicians and peace re-searchers is calling on the West German government to break with the 1979 decision of the Atlantic alliance to install a new generation of nuclear missiles in Western Eu-

In another of a series of attacks against the policies of Chancellor Helmut Schmidt and NATO, the "Gustav Heinemann Initiative" decried the decision as increasing the threat of atomic war. "Peace is not assured by a bal-

ance of of power in weaponry," the group said in a statement issued at a press conference Saturday. "No region of the world is more seriously threatened by atomic war than Europe ... This danger is only heightened by the NATO de-cision of 1979."

The members called for a review of the government's security poli-cies, including studies on declaring Europe "a zone free of atomic

weapons." The group is composed of sever-al dozen leading left-wing Social Democratic politicians as well as researchers from both private and university-funded institutes. It is named after a former West German president who shortly after World War II advocated a unified, disarmed and neutral Germany. **Bargaining Table**

Spokesman Erhard Eppler, a member of the Social Democratic Party's executive committee, said the group's goal was "to bring the United States to the bargaining

table. The NATO decision calls for stationing 572 nuclear missiles in several NATO countries by 1983 while simultaneously conducting arms control talks with the Soviet

Union But Mr. Eppler said that the Americans appeared more interested in stationing offensive weapons aimed at the Soviet Union in Europe than in protecting Europe

against Soviet weaponry. "It is the interest of the United States to direct a portion of the atomic threat against Europe," Mr. Eppler said. "Placing land-based missiles makes hostages of Germans and Europeans in any con-Secretary of State Alexander M. Haig Jr. "with facts and opinions." After that a decision will be an-nounced around the end of June flict between the United States and the Soviet Union."

Placing the NATO missiles in West Germany is "military, politi-cally and morally irresponsible," Mr. Eppler said.

Growing Reliance

Among the countries that sup-- ly large amounts of minerals to he United States are Zaire, South -- Irica, Zimbabwe, Gabon, Nigeria - nd Guinca.

The nation's reliance on imports f minerals and metals --- oil is as risen sharply over the past two ecades. Of the top 25 such imorted commodities, U.S. depend-

ncy now averages 70 percent, up com 54 percent in 1960, and for the second second items more than 90 ercent comes from abroad, acording to the Defense Departsent. The United States depends :n foreign sources for 20 of the 36 incrais it regards as strategic.

The country imports 98 percent of its columbium and tantalum, 97 creent of its manganese ore, 95 ercent of its cobalt, 93 percent of s bauxite and 91 percent of its bromite.

These are required for such rochicts as jet engines, specialty teels, missiles, turbines, gun barils, armor plate and aircraft uselages as well as many other inustrial products less directly re-uted to military hardware.

Chromium Deficiency

Planners at the Pentagon and ther government agencies note tat the supply of such items could e interrupted in situations well port of war and in some cases by te decision of one or two produc-rs in unstable parts of the world. They also observe that, unlike il, on which the country is now aly one-third dependent on forign sources, these materials are ot generally recognized as essen-al by the general public. Said one refense Department, official, "It asn't oil that the Germans ran at of in World War II - it was 'uromium."

The recommendation that the overnment establish the capabili-' to produce many strategic mateals at home would employ the , owers of the president under Title of the Defense Production Act to ake or guarantee loans or take her steps to ensure the availabiliof vital resources.

Hayden Address In S. Africa Off

The Associated Press JOHANNESBURG - A visit to

South Africa by the American political activist Tom Hayden and his wife, the actress Jane Fonda, has been canceled after the government issued the couple visas for entry to the black homeland of Bophuthatswana only, the Rand Daily Mail reported.

Mr. Hayden was invited to address students at the University of the Witwatersrand on Monday. The student groups that invited him said in a statement that a "breakdown in communications" resulted in the couple having the impression that their visas had been awarded "without any condi-

tions attached." The black homeland policy is considered the pillar of South Afri-ca's system of racial segregation. The students said they advised that the visit be canceled because they regarded the visa decision "as a crude attempt to use them [Mr. Hayden and Miss Fondal to-lend legitimacy to the aberration of separate development."

Young Dutch Squatters' Cause Admitted Even by Their Detractors

Seized from a Dutch construction company that planned to sell it on a rising real estate market, the Big Kaiser's high-ceilinged rooms, pungent with marijuana and cat biter, are home for about 40 Dutch young people. One building houses runaway children; another is used by patients of leftist psychiatrists who disapprove of asylum care. Most other occupants live in communes. Some have jobs and have started renovating their acquisitions; others live on unemployment payments - and work at organizing the squatter movement.

'As soon as we moved in, we barricaded the windows with iron plates stolen from building sites. We welded them to bars embedded in the walls so the police could not tear them off," Jan recailed. On three occasions, police planned assaults to clear the property, but the Big Kaiser used its own radio to summon thousands of demonstrators to mob the police.

Eventually, the Amsterdam city council bought the Big Kaiser, and now it is negotiating with Jan and his comrades to have them pay token rents.

Similar outcomes are frequent, and squatters claim that their ingenuity, with some official help, produces cheap conver-sions of spacious old buildings into modern bousing for young people,

In its initial months, the squatter movement was good-natured. In the early clashes

- **1**

in Amsterdam, police used burnor as a weapon. On one occasion, a crane hoisted a steel container known as the Trojan Horse onto an occupied building. When the 12 anti-terrorist policemen emerged on the roof, they were led by an officer dressed as Santa Claus.

Combat Disguises

Fighting back, the squatters installed omi-nous-looking tubes that they described as gas canisters, to intimidate the police. For combat, the squatters disguised themselves with wigs and sunglasses to prevent identification.

The clashes have become bloodier in recent months. Tough special mobile units of police and soldiers have been ordered into the streets. The squatters retaliate with ball bearings fired from powerful slingshots. Some irate landlords have hired gangs to break into their own properties and wreck them - and beat up the squatters - to get them to move out.

As feelings mount, many senior police officers deplore the amount of force being used by the authorities.

On the other hand, squatters have victimized some Dutch people. Families waiting for municipal housing have seen their property taken over before they could move in. Businesmen hesitate to take foreign posts

for fear of losing their homes. A new business - baby-sitting houses - has sprung un. The bottom has fallen out of the property market, partly because of the squatter threat.

'More Small Units'

Responding to the crisis, government officials say they have accelerated and changed their housing plans. "We have failed to keep up with changing social patterns," said a Dutch Housing Ministry official. "We need more small units for students and divorced people, and we need more big units for famlies that have decided to keep the elderly or the handicapped instead of sending them to institutions

A new law, the Empty Property Act, has been rushed through the parliament, requiring any dwelling empty for a year to be registered with the municipality, which can assess a rent and assign a tenant. An owner who fails to comply risks having his property requisitioned.

On the other hand, the new law authorizes summary eviction of illegal tenants - a provision foreshadowing a renewed police offensive.

These housing reforms are being closely watched in neighboring European countries. which are anxious to avoid seeing squatter movements of similar strength emerge in their citics.

SAUDI ARABIA A SPECIAL SUPPLEMENT

A Young Nation Is Thrust Into a Leading Role in International Affairs

By Kca Whittingham

Crown Prince Fahd

N EXT YEAR will be the 50th anniversary of the founding of the kingdom of San-di Arabia by Abdelaziz Ibn Saud, who by a mixture of force and diplomacy forged a unit-ed state from a vast desert region populated by numerous inimical tribes.

Half a century later, because of its vast reserves of oil, Sandi Arabia is one of the most important and at the same time one of the least understood nations, with a level of political and economic influence that belies its youth. Indeed, many of the ruling family's problems are rooted in the contradiction between the relatively early stage of develop-ment, and the demands of an international economic and political role.

For the first 40 years, the rulers had fairly For the first 40 years, the filters had fairly simple relations with other countries. From the beginning, as Western nations competed for dominance of the oil exploration and pro-duction businesses, King Abdelaziz put his faith in the United States, whose companies were offering a better deal than their British counterparts That close friendship persisted through the heady days of the Arab nationalist movement as state after state in the Arab

world won its independence from colonial-ism. Radical intellectuals raged over the rela-tionship, accusing the kingdom's leaders of being reactionary and of failing to see the United States as a major threat to the Arab world because of its support for Israel.

But Sandi Arabia ignored the radicals, maintaining its belief that only the United States could provide the technology required for development, the military assistance required for security and, as oil revenues grew, the capacity to absorb petrodollar invest-ments. Oil Minister Sheikh Ahmed Zaki Yamani continued to try to moderate OPEC price increases, and he continues to do so, making it clear that Saudi Arabia can and will control the oil market in the interests of the world economy.

Active Role

But while the kingdom still sees its eco-nomic future tied closely to the fortunes of the Western economy as a whole, events during the last four years have shaken a long-standing faith in the United States as a committed ally, and have at the same time forced Sandi Arabia to adopt a more active role in regional and international affairs.

The most dramatic cause of the reluctant change of policy was the Camp David ac-cords, and the consequent exclusion of Egypt from the Arab ranks. Saudi Arabia had been a firm backer of President Anwar Sadat as he turned Egypt away from Nasser's pro-Soviet policies and dismanuled the state-controlled economy. But the question of Jerusalem, the third-holiest place in Islam, is of more than political importance to the ruling family, who carry the title of Guardian of the Holy Places, and support for the Palestinians is both a religious and a political commitment. There is little doubt that former President

Jimmy Carter, and probably President Sadat as well, were surprised when Saudi Arabia failed to back the Camp David initiative. But while Saudi Arabia wants a peaceful settle-ment in the Middle East, it simply cannot abandon deeply held principles or expose it-self to the consequent radical backlash.

The second major shock was the fall of the shah, Mohammed Reza Pahlavi, which not only demonstrated the United States' inability to protect a client regime in the Middle East — even the most powerfully armed regime - but also brought an atmosphere of

crisis and revealed how little Washington understands the Gulf region.

With Egypt temporarily removed from its dominant position, and with Iran in a state of internal chaos and unable to share the burden of defending the Gulf, Saudi Arabia has found itself obliged to fill the vacuum of lead-ership both in the Gulf and the Arab world, partially because of its religious and financial status and partially to ensure that the leadership role is not taken by Iraq. Saudi relations with Iraq have improved in the last two years, but Iraq's relations with Moscow still raise doubts among conservative Saudi leaders.

The leadership has responded positively to the challenge. Despite health problems, King Khaled, virtually unknown outside the nation when selected by the family to succeed to the throne following the assassination of King Faisal in 1975, has proved to be a shrewd, quiet statesman and a harmonizing force among the princes who run the affairs of state.

A more active and open role has been giv to top ministers, with Crown Prince Fahd, Foreign Minister Prince Saud al-Faisal, Defense Minister Prince Sultan bin Abdelaziz

and Interior Minister Prince Saud Naif bin Abdelaziz frequently stating their views to the Arab and world media.

The first element in the new Saudi foreign policy has been to strike a deliberate and open policy of nonalignment with either su-perpower. "If the role of the superpowers toward our cause is constructive, there will be no obstacle to good relations with them," Prince Saud, the foreign minister, said before the visit of U.S. Secretary of State Alexander M. Haig. But he added: "We deceive our-selves if we consider that our relationship with the great powers [in effect, the United States] was based on friendship."

The prince also confirmed that Saudi Arabia has continuing contact with the Soviet Union, although there is no thought yet of diplomatic relations with the Communist bloc.

Prince Fahd, the most ardent supporter of a pro-Western policy, has also said on a number of occasions that, if the West refused to provide the weapons the kingdom wants, Sau-di Arabia would consider buying weapons from the Soviet Union, but be stressed: "Buymg weapons does not mean buying ideology.

King Khaled

This attitude is a key to Saudi Arabia's foreign policy as a whole. Relations with foreign countries are being built on the basis of mutual economic interest, and political alliances grow out of such a framework. With its large development projects and with funds avail-able for investment, Saudi Arabia has something to offer to rich and poor, advanced and underdeveloped countries alike, and is attempting through its economic influence to huild circles of friendship on the widest possible basis.

Thus, as Europe has shown itself more un-derstanding of the Arab case in the Middle East crises, so Saudi Arabia has been more willing to buy arms and technology from those countries, especially France and now West Germany. The nation has been gener-ous with aid for Islamic and Third World countries, seeking to ensure wherever possible that Islamic countries in particular have a chance to develop without coming under the total political control of the superpowers.

But it is naturally in the Gulf first and foremost that one can see the Saudi policy of self-

(Continued on Page 8S)

\$234 Billion Has Been Allocated For Wide-Ranging 5-Year Plan

CAUDI ARABIA has embarked on its third D five-year development plan, during which \$234 billion has been allocated for projects ranging from basic infrastructure and social services to the heavy industrial projects on which hopes for the kingdom's economic fu-

mre are pinned. The major task of Sandi Arabia's development plans is to improve the standard of living, in town and village alike. Special emphasis is now being given to villages in areas of agricul-tural potential, in an effort to persuade farmers to stay on their land rather than drift into the towns, as agricultural development is vitally important to the future of the Saudi econo-

According to Ghazi al-Ghosaibi, industry minister and chairman of Saudi Arabia Basic Industries Corp., more than 80 percent of the second development plan was put into creating infrastructure for industrial projects. During the past five years, 13,000 kilometers of paved roads and 10,000 kilometers of "agricultural" roads have been laid, and electricity has been provided for 1.6 million consumers. In all regions of the kingdom this type of basic development work will continue under the new plan. The central region's Municipal and Rural Affairs Directorate, for example, has a oneyear allocation of about \$90 million, which will be spent on roadworks in towns and villages, water networks, provision of slaught-erhouses and other community projects. A similar sum has been awarded to the southern region, where major drainage projects at Khamis Mushayt and Abha have recently been completed. Where possible, development contracts in the regions are being awarded to Sandi companies.

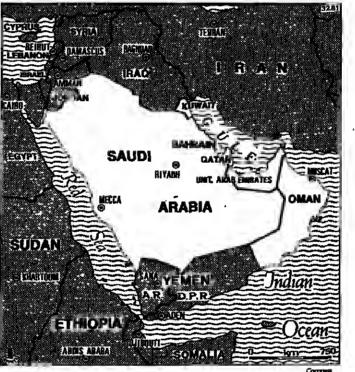

kingdom's ambitious projects in the two new industrial cities of Al Jubayl and Yanbu' al

Al Jubayl on the Gulf coast and Yanbu' al Bahr on the Red Sea coast became part of the , industrial development plan seven years ago following the dramatic rise in oil prices. A decision was made to use at least some of the nation's oil production to supply the domestic need for iron, steel and petrochemicals instead of merely exporting crude oil and then importing such products.

In addition, there was a growing awareness among members of the Organization of Petroleum Exporting Countries of the waste involved in flaring off gas instead of using it as a raw material. By one estimate, gas flared by OPEC producers until recently amounted to the equivalent of 6 billion barrels of oil a day. By the middle of the 1980s, Saudi Arabia hopes to be using its gas instead, as fuel and feedstock in steel and petrochemical complexes.

mentation, and by 1985 the kingdom will be producing petrochemical products, iron and steel, and fertilizers.

The key to these industries is a \$12-billion gas separation and storage system, which is nearing completion ahead of the scheduled date of 1983. A system of 29 separation plants spread around the oil fields will feed two larg-er units, one near Al Jubayl and one more than 1.000 kilometers away at Yanbu' on the west coast. The pipeline to carry gas liquids to the Yanbu' plant is the longest built by the Arabian American Oil Co. since the Tapline 30

Special to the IHT

TN THE LAST five years, Saudis have taken L over much of the planning and administra-tive control of Saudi Arabia's future — a major feature in the nation's development.

As long as development depended essential-ly on outside advice, there was a risk that projects would benefit foreign contractors more than the long-term interests of the people of the region.

An example of the shift toward Saudi man-agement is Ali Abdulrahman al-Khalaf, secre-tary-general of the Qatar-based Gulf Organization for Industrial Consulting. Mr. al-Khalaf was appointed when the organization was created in 1976, and is soon to hand over the job to Suleiman al-Mejil, from the King Abdelaziz University for Petroleum and Mineral Studies.

The Gulf Organization for Industrial Con-J DY

Last 2 Contracts

In May, the last two contracts for the first phase of the development of Yanbu' and Al Jubayl up to 1985 were signed by Mr. Ghosaibi. On May 20 an agreement was signed with Dow Chemicals for the establishment of a joint-venture petrochemicals complex in Al Ju-bayl. The project, estimated at \$1.3 billion, is considered the most important of the 10 projects being carried out by the Sandi Arabian Basic Industries Corp. in conjunction with international companies. The SABIC-Dow com-plex, which is scheduled to begin production in mid-1985, will produce ethylene and polyethy-

The second contract, for a \$1.5-billion petrochemical complex, also in Al Jubayl, was signed with a Japanese consortium headed by the Mitsubishi Group. A joint company under the name "Sharq" (Eastern Petrochemical Co.) has been formed. The complex will work in cooperation with the SABIC-Dow complex, which will be known as the Arabian Petro-

chemical Co. (Petrokemya). Sharq is the largest joint venture to be un-dertaken between Saudi Arabia and Japan. This agreement means that the first phase of SABIC's industrial program is ready for imple-

years ago. About half of the gas resulting from oil producion is intended directly for use as fuel for the beavy industries. The rest will be treated at fractionating plants at Yanbu' and Ju'aymah, where gascous ethane will be ex-tracted as feedstock for petrochemical plants and the heavier propane, butane and natural gasoline will go to the export market.

When completed, the two industrial zones at Al Jubayl and Yanbu' are expected to have populations of 370,000 and 150,000, respectively, and will encompass seven petrochemical plants, three oil refineries, a steel complex and a fertilizer factory. About \$87 billion will be spent on these and other industrial projects during the current development plan.

The scale of Saudi Arabia's industrial program raises questions over how big the market will be for Gulf exports. Crown Prince Fahd has stressed in interviews with the Arabic press: "We look on the Arab Gulf states as colleagues and members of the same team working to the same purpose. We believe any industrial progress in Sandi Arabia is in the interests of the whole Arab world, and we do not ever expect see industrial competition [as

opposed to cooperation] among the Arab countries."

Nevertheless, by the late 1980s Saudi Arabia will be producing more than 5 percent of the world's petrochemical products, with an inevitable impact on the marketplace. Mr. Ghosaibi has warned that traditional producers must be prepared to make adjustments.

Other Producers

As for other Gulf producers, Saudi Arabia recently signed an agreement with Qatar whose petrochemical complex at Umm Sa'id, the first in the Gulf, began operating at the beginning of the year — for cooperation in marketing, training and other aspects of the petrochemical and steel industries, ensuring that Qatar will not be squeezed out of the market by its bigger neighbor.

The Gulf Organization for Industrial Consulting, of which Saudi Arabia is an active member, is also attempting to ensure a complementary rather than competitive approach to industrial development in all the Gulf states, including Iraq.

- KEN WHITTINGHAM

including Iraq, to coordinate industrialization plans and avoid the kind of duplication that followed the increase in oil revenues in the mid-1970s. At the time, the concept of industrialization was little understood, the kind of statistical material necessary for coordination hardly existed and the idea of long-term planning was virtually nonexistent.

Team of Professionals

From the beginning, Mr. al-Khalaf had a problem. There was, he said, a tendency for people to think that the mere creation of an organ for cooperation meant that cooperation existed. So his priority was to draw together a team of professionals mostly from the Gulf states and to develop a method of operation to ensure that the organization would at least sur-

The organization is a consultative body with no executive powers, and above all it is not supranational. Mr. al-Khalaf stressed that it was vital to determine the goals of the organization with great care, so that projects would win unanimous acceptance and the organiza-tion would not be hurt by political disputes. The group was intended to identify industri-

al projects that would benefit the region as a whole but that did not fit within the economic framework of one state. It also sought projects that could best be located in one of the poorer areas, for example, because of available man-power and resources, but that required outside capital and would therefore help that area's development.

With the exception of aluminum, which is intended for exports, most of the 10 projects under study or implementation will supply the local markets.

Information System

To cope with the need for an information system, which has no precedent in the region except in Iraq, Mr. al-Khalaf and Abdulilah Dewachi, an Iraqi data systems expert, created the Industrial Data Bank. In addition to classifying and analyzing information from the vari-

ous states, it draws on major international sources to analyze market and production projections as well as socioeconomic indicators. One of the most important achievements of

the Gulf Organization for Industrial Consulting is that the member states bave begun to copy and upgrade their information systems. Saudi Arahia recently announced the establishment of a major statistical research unit, in addition to facilities already created in its universities.

On Feb. 10, 1981, the first major projects of the organization reached the implementation stage when the industry ministers of the seven states signed an agreement for a common project, an aluminum rolling mill in Bahrain. Saudi Arabia already bad a 20-percent share in Bahrain's aluminum smelter ALBA, and the states agreed that at least in the first stage of industrialization it made sense to continue to develop this sector in Bahrain.

Mr. al-Khalaf said that he was pleased and surprised at the speed with which the agree-ment was reached. Since then, he has pushed through an agreement in principle on the location of a float glass plant in Iraq, and discussions are under way on the location of a petrocoke plant. Seven other projects are undergoing further research.

Most of the projects under study involve government financing. Although these ventures are identified by the Gulf organization as economically viable, they are not commercially viable in the sense that they would not produce the quick returns required by private sectors investors. But on ventures that are feasible privately, information is made available to interested parties.

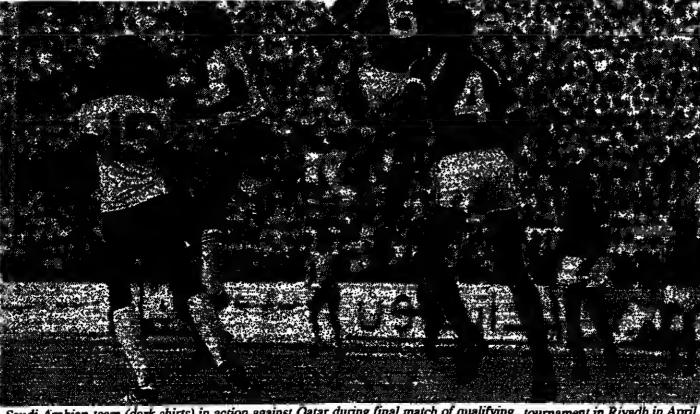

Soccer Bursts Into Bloom as Sports Grow

DESPITE the short history of soccer in the country, young Sandis are as pas-sionate about the sport as their counterparts in any European nation, and just as knowledgeable.

Two months ago, Saudi Arabia's national soccer team won the Asia Group Two qualifying tournament for the World Cup to be held in Madrid next June. The Saudis will compete in the regional qualifying finals against Kuwait, China and another team yet to be decided. Two of the four teams will enter the final stages in Madrid. Should San-di Arabia reach Madrid, it will be a dream come true.

From the government point of view, the encouragement of sport on a national and international scale is vital for two reasons. First, as the modern way of life replaces the tough survival conditions of desert existence, it is of paramount importance to ensure that young people are physically fit and active. Second, the Arab states as a whole are only too aware of the power of sport in creating good will and friendly relations around the world.

The current success of Saudi Arabia's national side may have surprised the outside world, especially since the regional favorites, the experienced Iragi team, were defeated on the way. But it was no surprise within the Arab world and the Gulf. Since the Gulf Championship was initiated about 10 years ago, there has been a great spur to development of the sport. Moreover, the success of Iran and Tunisia in the last World Cup

Saudi Arabian team (dark shirts) in action against Qatar during final match of qualifying tournament in Riyadh in April.

proved that teams from the Middle East can play with pride and confidence at full international level.

Consequently, Saudi Arabia set an ambitious plan to develop the sport throughout the country, calling in one of the best-known names in British football, Jimmy Hill, as a consultant. The result of the plan was thatsoccer pitches began to spring up all over the country, and soccer training was introduced in schools.

At the national level, big names in world soccer were brought in to share their experience with the young Saudi players. Tunisia's Tareq Diab, who impressed sports fans worldwide with his deft midfield skills, was invited to join a Saudi club. Brazilian star Roberto Rivelino was paid an enormous fee by another club so that some of his talent might rub off on its players. And Pele, an (Continued on Page 8S)

Contract Near for Causeway Linking Nation With Bahrain

Special to the IHT

TOWARD THE END of this month the final details and documentation should be ready for contracts to be signed for the construction of the much-discussed causeway linking the eastern province of Saudi Arabia with Bahrain.

The 25-kilometer causeway, which is expected to cost at least \$800 million, will be financed by Saudi Arabia. The contract is expected to be signed in Bahrain by Saudi Finance Minister Muhammad Abul Khail and Bahrain's minister of industry and development, Youssuf Ahmad Shirawi.

Although the winners of the contract have not yet been officially announced, this major project is thought to have gone to a Dutch-led consortium that includes a Saudi company. The scale of the project, which will take up to five years to complete, means that there will also be plenty of work and orders for local manufacturers and contractors.

Subcontracts

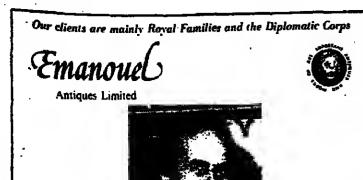

It is expected that subcontracts will be divided about evenly between the two sides, although Bahrain will no doubt provide accommodation and service facilities for the expected 5,000 construction workers.

Much of the debate over the causeway has been concerned with the effect of creating a land link between the most conservative state in the region, Saudi Arabia, and the most liberal, Bahrain. But officials on both sides say that there is no desire on the part of Saudi Arabia to impose anything on its smaller neighbor.

On the contrary, the feeling is that trade and industry on both sides of the water will benefit greatly from an expanded market, and, in the case of Bahrain, shipment of ford imports by land instead of airfreight will help to improve the standard of living by cutting costs.

The causeway is considered both in Saudi Arabia and Bahrain to be one of the most important and historic projects to be undertaken yet in the Gulf, a symbol of the new mood of cooperation governing the area

INTERNATIONAL HERALD TRIBUNE, JUNE, 1981

Country's Status Increases Within the IMF

By Edmund O'Sullivan

CAUDI ARABIA'S place in the D international monetary system received further recognition in a unique deal announced earlier this year by the International Monetary Fund. The kingdom's IMF quota was

doubled by the fund's board of governors, raising it to 2.1 billion special drawing rights (\$2.55 bil-lion) from 1.04 billion SDRs (\$1.26 billion).

This dramatic increase follows one of the biggest loan agreements ever recorded. In March, Saudi

Arabia agreed to lend up to 4 bil-lion SDRs (\$4.7 billion) to the IMF in each of the next two years, and probably in a third. The king-dom was also given a permanent seat on the IMF executive board.

The two deals -- which will increase the kingdom's voting power on the IMF board to 3.5 percent from 1.74 percent — are consid-ered a breakthrough for a number of reasons. They will strengthen the fund at a time when non-oil producing countries' balance-of-payments deficits are growing because of higher energy prices. Ac-cording to the IMF's managing director, Jacques de Larosiere, about 6 billion to 7 billion SDRs is needed in 1981 alone to assist member countries. At least this much will also be needed in 1982.

Political Issues

From Sandi Arabia's point of view, the IMF deals will provide support for its claims to be taken seriously by industrialized coun-tries in both political and economic matters. The kingdom has avoided introducing its political aspirations in negotiations with the IMF - most notably its view about how a comprehensive settlement of the Palestinian issue can be achieved. Nevertheless, Sandi Arabia has previously sought observer status for the Palestine Liberation Organization at IMF and World Bank meetings. This question is likely to arise again in future talks.

Additionally, the deals may boost the further use of the SDR, which was created in 1967 to supplement international liquidity but which has so far failed to play the part in the monetary system that many hoped it would. This development owes something to the IMF's decision earlier in 1981 to simplify the basket of currencies used to value the SDR. It also reflects growing dissatisfaction with turns on their dollar-denominated national currencies as a medium of exchange and store of value because of the chronic instability of foreign exchange markets. Finally, it enhances prospects for oil-pricing in SDRs.

Increased use of the SDR both by supranational agencies and prigovernments. vate sector borrowers will please Saudi planners and other members of the Organization of Petroleum Exporting Countries, who have recorded less-than-satisfactory re- current interest rate in the five cur-

investments because of inflation and the U.S. currency's weakness at times on foreign exchanges. The kingdom's attempts to diversify the currency mix of its overseas investments include loans in 1980 to the Japanese and West German

A feature of the Sandi-IMF package is that interest on the loans is closer than ever to market levels. It has been based on the

rencies now in the SDR basket, plus a margin of one-sixteenth of a percentage point, giving a total of 11 percent. Even more significant is that the Saudis will be able to convert the IMF loan into bearer bonds, which can be sold in secondary bond markets.

CHINESAU JEINE & R. SOR

gether with leading industrial countries who have been asked to provide \$1.2 billion. protection through cooperation rather than confrontation. At the recent Gulf Cooperation Council summit meeting, Riyadh was selected as the headquarters for the council's secretariat, and the meeting also affirmed the policy that Saudi leaders have been declaring for some months — that the interests and security of the Gulf can only be defended by the people of the Gulf. The concept of foreign bases and intervention forces was rejected .a response to the U.S. request to base the Rapid Deployment Force in Saudi Arabia or

Although Saudi Arabia has the world's largest military budget per capita, it is doubt-ful whether the Gulf states alone or collectively could in fact repel a sustained military attack, But Saudi Arabia and its neighbors argue that, as long as neither superpower is based in the Gulf, there is no reason for either to attack. The presence of foreign troops not only raises the threat of military action but

also raises dissent among radicals who have been active opponents of Western military presence in the past but are now largely content with the situation.

Gulf Council

The Gulf Cooperation Council is more than a strategic body. Saudi Arabia and the other Gulf states know that stability depends on balanced development throughout the region so that no state is left behind to become a breeding ground for discontent. This idea extends to the Arab world as a whole and is the principle behind the program for an Arab decade of development agreed upon at a sum-mit meeting in Amman last year; it will be financed by the oil states, led by Saudi Ara-

On the wider international front, Saudi Arabia is seeking to use its financial influence through such bodies as the International Monetary Fund to press for a radical change in the world economic order so that developing countries who do not have Saudi Arabia's wealth do not find themselves crippled by in-, terest payments on development loans. The Saudis also want the West to make a larger contribution to development because they believe that worldwide development is in the interest of all nations.

creases. The IMF deal is one of the

most impressive signs of the king-

dom's commitment to global eco-

nomic stability and the welfare of

the less developed world.

The political ramifications may be the real legacy of the IMF deal.

The IMF is now expected to

Saudi rulers adopt a discreet approach to foreign relations, partially because of a conservative attitude toward the media and parnally because they do not like the use of pressure and blackmail. Saudi Arabia has avoided moving from cooperation to confrontation by using oil to force the West to do what it wants --- on the

Palestinian issue, for example. Prince Fahd said recently that using pressure of that kind would imply that the Arabs did not have right on their side, but he also said, "Oil is a vital resource for the world, but when people are left to suffer, then any weapon may have to be used, and it is not always necessary to talk first before taking action."

Soccer Making Progress

(Continued from Page7S

idol of youngsters throughout the Arab world, was invited to run some training sessions. Mostly, however, it was a ques-

tion of sheer hard work, of persuading players of the necessity to train daily to improve their stami-na and skills, and of providing the facilities for them in a countrywhere the climate is hardly conducive to the rigors of physical exertion. These facilities have mushroomed - some provided by the state, others by princes who personally finance many of the leading sports clubs in Saudi Arabia. One young prince, Talal bin Mansour, chairman of the littihad cinb in Jidda, is estimated to have paid about \$10 million to develop the

club in the last five years. Recently, the chairman of the Saudi Youth Welfare Organiza-tion, Prince Faisal bin Fahd Ibn. Abdulaziz, signed a contract with an international company to build a \$75-million sports city in the summer resort of Taif. Although not all on the same scale, there are many such projects in most of the major towns as the demand for sports facilities continues to grow. 1

Swimming ...

Most international sports are now played in Saudi Arabia at one level or another, with particular emphasis on athletics, and perhaps surprisingly on long-distance swimming. Saudi Arabia used to, sponsor an international English Channel relay race, partially with) the aim of giving Arab swimmers, the chance for high-level competitive experience.

But the main passion is and probably always will be soccer. Lo-cal matches, especially for the well-established clubs like Ittihad of lidda and al-Nasr of Rivadh, draw large crowds for domestic league competitions and knockout cups. Indeed, when Ittahad fell in this" year's league from first to sixth. place, it created a nationwide enquiry and speculation of the kind one expects when major teams like Liverpool or Ajax fail to appear at the top in their respective countries. Built by forced labor under Western engineers, the 1,500-miledesert track took eight years to complete. In 1908, the first train

left Turkey for Arabia. The long, difficult route passing through waterless desert made the

A rapid-transit line from Damascus and Amman to the Gulf ports would cut costs.

great Hejaz railroad one of the wonders of the new age of engi-neering, but its history was short, as moviegoers know well. Those scenes in David Lean's "Lawrence of Arabia," where Lawrence leads the Arab forces to attack Turkish troop trains and blow up the track, were based on fact. T.E. Lawrence ordered the Arab

Heat to destroy the railroad to Virtually the whole length of the routes.

Hejaz was put out of commission.

Since 1916, there have been numerous plans to revive the railroad, with both King Abdelaziz Ion Saud, the founder of the kingdom, and his succesor, King Saud, providing money for studies to be made oo reopening the railroad. By 1956, plans had been established but no work was carried out.

Earlier this year the Hejaz railroad project was again raised in discussions among Jordan, Syria and Saudi Arabia. But despite the enthusiasm of Saudi Communications Minister Sheikh Hussein Ibrahim al-Mansouri, who sees the railroad as an excellent long-term proposition, no decision was made and the matter was once again deferred.

Originally, the idea was to provide access to the holy places of Islam for pilgrims, who otherwise faced a long and dangerous jour-ney through the desert to Mecca. But these days the railroad has more far-reaching implications. Fleet after fleet of trucks and

landtrains pass daily from Syria through Jordan to Saudi Arabia and the Gulf beyond, carrying fruit and foodstuffs, but also troops under King Hussein of the much-needed electronics and mechanical equipment that cannot be prevent a Turkish advance in 1916. consigned to relatively slow sea

Part of Open Sea Tanker Terminal at the Al Jubavl industrial harbor. Jubayl population may hit 300,000 by end of decade.

gauge line on which trains take up to 10 hours to pass between Amman and Damascus instead of three by road) crossed from Damascus and Amman to the ports of the Gulf, then the cost of carrying goods to far-flung mar-kets would be greatly reduced.

If a railroad line allowing rapid This was the route used by the transport (not the existing 105- camel trains in pre-industrial days, and makes commercial sense now as it did then. **Mineral Deposits**

Moreover, the exploitation of large mineral deposits in southern would require efficient transship- tal with the Gulf coast will cost

ment systems to give access for export materials to Red Sea or Gulf ports. And the original reason for

constructing the railroad, the pilgrimage, is even more valid now than it was 60 years ago. This year the number of pilrims is expected to reach 1.5 mil-

lion and is increasing every year. Already the authorities in Saudi Arahia have had to discourage private cars from making the journey. and even with the new King Khaled airport in Jidda, there is a limit to the number of air travelers who can be processed in a matter of two or three days, and a train would simply be cheaper for many poor Moslems from the northern

It seems likely, therefore, that the railroad will be rehuilt, especially since Saudi Arabia is embarking on its own network of railroads, which would eventually connect with the great Hejaz track.

The first contract to upgrade an old single-track railroad between Rivadh and Dammam has been awarded to the Greek company Archirodon. This first section will double the track from Dammam to

Hofuf, a distance of 145 kilometers. The next phase will see a new track laid from Hofuf to Riyadh, cutting the travel time for the total Dammam-Riyadh journey to four Jordan and northern Saudi Arabia hours. The project linking the capi-

around \$300 million and take three years to complete.

The link between Riyadh and the Gulf coast is becoming vital, both for connections with the port at Dammam, where a \$151-million dry-dock repair yard is under coo-struction. and for passenger traf-fic, since the huge industrial complex at Al Jubayl is expected to have a population of some 300,000 by the end of the decade.

The Riyadh freight terminal is operated by Kanoo Terminal Services, a joint veoture of the well-known Kanoo organizatioo and the Nedlloyd group of Rotterdam. Management expertise will be supplied by the Dutch group, which will also have responsibility for training Saudi nationals.

Riyadh, with its 550,000-squaremeter terminal, thus becomes the first inland bonded unit in Saudi Arabia

The success of this venture will undoubtedly determine the future of a continuation of the railroad line across Saudi Arabia to the Red Sea and the Yanbu' industrial complex and then up to Amman and Damascus.

If the connection is made and the great Hejaz railroad is restored to activity, there could be a real boom in commercial and tourist traffic all over the Middle East, with the monopoly of the airline companies broken at last. -KEN WHITTINGHAM

Light-Industry Projects Are Encouraged to Help Cut Imports

SEVENTEEN YEARS ago a Sandi businessman from Riyadh, Sheikh Nasser al-Hamid thought there might be a future in making metal furnishings. Now he has a flourishing factory turning out air conditioners, water coolers, metal storage cupboards and other products. - 22

Sheikh Nasser — known as the father of Saudi industrialists and other pioneers, who have worked at changing the domestic economy of Saudi Arabia from trade to production, could take pride when, earlier this year in Riyadh, Jidda and Dammam, weeklong exhibitions of local industry were held to show Saudi citizens and the rest of the world that there is more to the kingdom than sand and oil.

There are now more than 1,000 manufacturing companies operating in Saudi Arabia, some purely local, others in partnership with foreign companies. At least 600

sprang up during the last five-year dustrial Development Fund, set up development plan. dustrial Development Fund, set up seven years ago to give financial

Opening the industrial exhibi-tions, Crown Prince Fahd said that the industrial zones established throughout the kingdom cover more than 14 million square meters, and that the capital investment of private sector industry stands at more than \$8 billion.

Financial Aid

The aim of the light-industry expansion program, said Prince Fahd, is to persuade the private sector to enter into as many areas of manufacture as possible, to reduce the heavy burden of imports. "I do not speak of self-sufficiency," he said, "for self-sufficiency is simply not a realistic target in this age, but we aim as far as possible to replace industrial imports by lo-

cal products,' The main impetus for persuading Saudi businessmen to enter infar, and repayments have, on the competition with the imports that whole, been on time.

seven years ago to give financial and technical aid to new ventures. SIDF is vital to domestic industrial development, as it not only aids small businesses but is responsible for financing major electricity projects that aim at giving the entire kingdom sufficient power by the end of the century.

Since its inception SIDF bas disbursed more than \$2 billion to 577 industrial projects. Loans are given up to a maximum of 50 percent of a project's capital and are repayable over five years at no interest, though a 2-percent service foe is

levied recedes slightly there is also coo-siderable emphasis on domestic The fact that a project is fi-nanced by SIDF usually means products and processed foods. INTERNATIONAL HERALD TRIBUNE, JUNE, 1981

SAUDI ARABIA

The Renaissance of Islam

Special to the IHT FROM MOROCCO to In-donesia Islam in the H donesia, Islam is stirring. Af-ter almost 400 years of being bur-ied under colonialism, Islam is again becoming a force in the world, and in many ways the heart of the renaissance is in Saudi Arabia.

The movement is a renaissance - not a revolution, as it has been described in the West since the shah of Iran was overthrown. Despite the publicity given to events in Iran, the main force of the resurgence of Islam is not, as 19thcentury historians might have described it, e movement for "Islam or the sword." It is, rather, a question of almost one-third of the world's nations regaining confidence in their religious principles and social code.

The movement can basically be attributed to the fact that Islamic nations possess more than 60 per-cent of the world's oil reserves, and consequently, with the rising price of oil they have, despite their underdeveloped state, gained a posi-tion of influence in the world economy. Saudi Arabia's role as the world's largest of exporting com-try is crucial to the movement.

Quite apart from its financial power, Saudi Arabia is the birthplace of Islam and the location of its holiest places. Every year, Moslems from all over the world gather in Mecca for the pilgrimage, a duty at least once in a lifetime for every Moslem who is able to attend.

Feast of Sacrifice

This year the pilgrimage, which takes place during Id al-Adha, the feast of sacrifice, will be in August, and more than 1.5 million Moslems are expected to attend. This vast annual influx is one reason for the construction of the King Abdelaziz Airport in Jidda. The airport, which cost \$5 billion, includes a special terminal for pil-grims that can handle up to 20 ful-ly loaded jumbo jets at once. Once, the pilgrimage was im-portant to the economy of the re-

gion, for it was a great trading event as well as a religious gathering. But these days the cost of providing transport, accommodations and medical facilities for the army of pilgrims is a large expense.

Islam requires a great deal more from the adherent than acceptance of a set of dogmas. It is a social and legal system, regulating every aspect of the life of the individual and the nation.

Moslems say that the newly discovered strength of Islam is not a threat to the rest of the world.

(• 11

This year the pilgrimage, which takes place during the feast of sacrifice, will be in August, and 1.5 million Moslems are expected to attend.

Sheikh Ahmed Zaki Yamani, Saudi Arabia's oil minister, told a conference in Geneve recently: "Moslems must speak out and ex-plain the true principles of Islam in order to allay those fears and eradicate all traces of hatred." But he also said that Moslems should shed their bitterness toward the West, and he called for efforts to increase understanding between Moslems and Christians.

Economic Influence

Islam has an important economic component and this it where the full force of the Islamic renaissance is being seen. As the Islamic nations have shown a willingness to come together as a world groupso have Saudi Arabia and ing, neighboring oil producers been willing to help finance the develop-ment of the Islamic world from Morocco to Indonesia. A special fund based in Jidda, the Islamic Development Bank, plays a major role in providing funds, and Saudi

Arabia also provides large sums through bilateral agreements. Islamic principles are also entering the banking world. In several Arab countries there are new banks operating on Islamic principles, which means that there is no interest on deposits or loans, only profit-sharing in investment. A Saudi prince, Mohammed al-Faisal, is chairman of the Sharja-Islamic Investment Co., based which in the three years since it

was formed has attracted about 10,000 investors and more than \$70 million of capital. At e recent meeting of the board of directors of Islamic Investment in Geneva, steps were taken for the establishment of a 49-nation Dar

al-Mal al-Islami (Islamic Finance House) with an initial capital of SI billion to allow the entire Islamic world to benefit from its own economic rules,

The advantage of the Islamic investment system with its ban on interest is that a project in a devel-oping country has a chance to sur-

vive and become profiteble with-out being burdened with escalating interest repayments, which in many cases have kept developing countries in a permanent state of bankruptcy. The Islamic Invest-ment Co. enters into financial partnership with a company or in-dividual. If the private investor fails to make the scheme work, the most he loses is his stake; the IIC then moves in its own management. If the project succeeds, the private investor can buy out the IIC's stake over five years.

The resurgence of Islam has also engendered a new spirit of research and enquiry, as Moslems try to rediscover their history.

During Europe's Middle Ages, great works of scholarship were written in the Islamic world that have influenced later scientific development in many fields. For more modern history, a department in King Abdelaziz University in Riyadh is preparing studies on Moslem minorities around the world and has begun to publish an academic journal to publicize its findings.

Marriage Pays

Special to the IHT

IKE ALL of the Gulf states, Saudi Anibia suffers from a L shortage of national manpower, and m fact it is generally underpopulated with a population density of only about 9.01 per square mile. Many of the nation's development plans depend on a steady population growth.

Yet young Saudi men are showing a reluctance to get married Yet young Saudi men are showing a forevente to get manned because inflation has affected the level of downes. The dowry is a vital part of the Islamic marriage system, guaranteeing the bride a measure of financial security in the case of divorce - which is especially important since under Moslem law a man can divorce his wife with relative case.

Several of the Gulf states have sought to persuade young men to get married and start families. Qatar and Iraq have created systems of loans and grants to young men facing financial bartship; while Oman has set an \$1,800 limit on dowries.

Last month, Saudi Arabia also announced new measures. Poor Last month, Saudi Arabia also announced new massive. Poor Saudis, provided they can prove that they adhere to the practices of Islam, will be eligible for grants of up to \$7,000 when they marry. The funds, donated by King Khaled, members of the rul-ing family and an anonymous donor — who gave \$300,000 — will be disbursed only to those unable to raise sufficient funds on their

It is hoped that this initiative will encourage marriages between Saudis and thus increase a population that is in danger of becom-ing a minority in its own land.

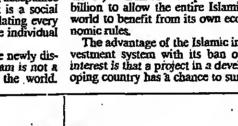

Another recent ruling by the religious anthorities declares the right of a bridegroom to see his bride unveiled at least once before the marriage takes place.

THE HOLY PLACES

At left, Moslems gather to pray in the Prophet's Mosque of Medina, Above, two of the seven minarets of Holy Mosque of Mecca.

The Kingdom of Saudi Arabia, during the past three years, has expanded and improved its nationwide telecommunications network at a pace more rapid than that of any other country. This ramarkable growth and -

modernization is clearly evident in the quality and scope of telephone service. Contraated with the situation in tha racant past....

Tha Kingdom now has more than 441,000 telephones in servica: transmission quality is excellent:

Seventy per cent of the 1.25 million international calls per month are dialed by talaphone users themselves to 94 countries: operators can dial to an additional six nations, and virtually any telephone in the world is accessible to Saudi Arabia:

The telephone systam will soon be all-electronic: **Diractory Assistance service** is prompt and courteous; Administrative functions, eided by computer tachnology, hava been streamlined;

Many communitiaa formerly without telephones now have servica.

The entira Saudi Telephona organization, under the guidance of His Excellency The Minister of Post, Telephones and Telegrephs, functions as ona, co-ordinated, integrated system.

Bell Canada, with its systems approach" to management, is proud of its contribution to the rapid transformation of Saudi Telephone. In 1978 the company signad a contract with the Ministry of PTT to organize, operate and maintain the telephone system and to train Saudi nationals to menege it.

The company has more than 800 managers, most of them in Saudi Arabia, working fulltime to fulfill that mission. It has introduced standard prectices end e common management philosophy, which has produced an integrated telephona organization, steffed 62 per cent by Saudi nationals and 38 per cent by people of many netions. Seudis represent 72 per cent of the management team.

Bell Caneda has provided more then half e million man-hours of instruction in schools established in Saudi Arabia, and has developed and has developed Bell Canada

and implamented mora than 100 different technical, administrative and menageriel courses. In addition, hundreds of Saudi Talaphona personnal raceive training in Canada. This year. 790 man-weeks of treining of Saudis in Canada is scheduled.

This training is aimed at preparing Saudis to assume the complete manegament of one of the world's most advanced talephone systema - a maasive transfar of technology. The system, still growing rapidly, is essential to achiaving the Kingdom's social and economic objectives.

Bell Canada, through its subsidiary, Bell Canada International, and directly, has been involved in telecommunications projects in more than 40 developed end developing countries eround the world. It provides managemant research and ... consulting and undertakes, turnkey projects. It offers a wide range of training facilities in all aspects of telecommunications; including state-of-the-art digital technology

SAUDI ARABIA **Cutting Back the Food-Import Bill**

TT IS ESTIMATED that Saudi L'Arabia imports about 90 percent of its food requirements, and the government expects to spend, just under \$1 billion on subsidies. this year to stabilize the cost of basic foodstuffs."

ays

Not surprisingly, the third five-year development plan is begin-ning to turn attention to the rural areas and the water resources needed to expand cultivated land from the present 600,000 hectares to the potential 2 million hectares.

At a recent conference in Dubai, the secretary-general of the Union of Arab Food Industries, Falah Said Jaber, wained the states of the Gulf and the Arabian Peninsu-la that they should take urgent measures to reduce their depend-ence on imported foodstuffs. He pointed out that only about 10 per-cent of cultivatable land in the region was being used, and that crop yields per hectare for wheat, for example, were less than half of that in developed countries.

During the next five years, \$2.4 billion will be spent to increase food production. Of the \$12 billion to be spent on the development of water resources, a considerable roportion will be of direct benefit to the agricultural sector.

At present, Saudi Arabia is one of the lew states in the region to grow both wheat and rice, and, according to statistics produced at. the recent conference on food strategy in the region, the kingdom, covers 46 percent of its needs for

in the past, livestock and dates provided the basic means of survival but, since oil production began, the Bedouin population has decreased dramatically as people left the rural areas to find more amenable and better-paid work in the towns. Grazing land has de-

clined in quality, and little has been done until now to improve the social conditions in the more remote areas.

K EN WHITTINGHAM, who coordinated this survey and wrote most of the articles for it, is a British journalist who has long specialized in the Middle East, both as a writer and an editor.

Mr. Whittingham, who will be coordinating the IHT's upcom-ing surveys on other Gulf nations, is a former deputy editor of Arab Month magazine, and a former news editor of the Gulf Times in Oatar. He continues to contribute as a free-lancer to numerous publications on Middle East affairs.

His university studies focused on the Middle East, and he is fluent in Arabic — he has translated five Egyptian plays as well as official Arab documents.

EDMUND O'SULLIVAN is a senior staff writer with the London weekly Middle East Economic Digest.

An irrigation canal in Unaiza: Water supply is a priority.

Inspectors visit a farm in southern Saudi Arabia.

about 2 million sheep a year, but in 1985, the kingdom will have 28 under the development plan efdairy farms. Efforts to double the production of poultry farms should mean that 50 percent of deforts will be made to boost beef production. A dairy farm at al-Kharj will have 18,000 head of catmand for eggs and chickens will be tle by the end of the year to promeL vide both beef and dairy products. By the end of the five-year plan

The main effort will go into wheat and vegetables. Between 1975 and 1980, wheat production increased by 42 percent, and during the next five years the area of land for wheat cultivation will be increased to 60,000 hectares. Experiments are being made at a number of research stations to find the best varieties of seed for local conditions, and training programs are provided for farmers to use seed and fertilizers effectively.

Meeting the agricultural require-ment of nearly 2 billion cubic me-About 3,500 young Saudis are expected to be trained in agricultural methods is the next five years. Also, following recent dis-cussions with Australia, it is possi-ble that some students will be sent supplied.

to that country, which has considerable experience in desert conditions similar to those of Saudi Ara-

Agricultural development has figured prominently in talks with a number of countries. Finland is to cooperate in the development of forests, fisheries and farmland according to an agreement signed in March. French companies may contribute to farm development and water desalination projects. Denmark is involved in the dairy industry through the Danish Saudi Dairy, one of 46 food manufacturers in the kingdom financed by the Saudi Industrial Development Fund.

Political Risk

However great the efforts of the next five years, it seems unlikely that Saudi Arahia will become selfsufficient in wheat within the next 10 years as its experts are claiming. but it may go a long way toward reducing imports. The Saudis have noted, as have others in the region, that dependence on the outside world for food carries an enormous political risk as well as an economic one, as demonstrated by the U.S. sanctions against Iran after the taking of the hostages.

This in part explains why Saudi Arabia has been generous in aid to North Yemen. An extensive assist ance program, which has been running for years, was boosted about two months ago when Saudi Ara-bia announced an additional \$100-million contribution to North Yemen's 1981 budget.

Saudi Arabia has also agreed to help finance the drilling of 50 artesian wells and a comprehensive study of rural development needs. It is also a major contributor to the special fund set up by the Arab League heads of state for the decade of development: One of the main targets of the program is to increase food production in poten-tially highly cultivatable areas like Sudan, the Yemens, Syria and Jor-

Meanwhile, in Saudi Arabia itbeen created to coordinate the work of various authorities. While more desalination plants will be established and projects for recycling wastewater installed, one of the major hopes for agriculture is the discovery of major underground reservoirs in the central and eastern regions, estimated to be sufficient to irrigate 250,000 bectares for the next century.

ters of water a year will not be easy, but if food production is to increase the water simply must be - KEN WHITTINGHAM **SAUDI CAIRO BANK**

ho are Wardley Middle East?

Wardley Middle East are a merchant bank wholly owned by The Hongkong Bank Group, one of the world's major international banking organisations, with assets of US\$47 billion. Wardley's own special asset is the backing of a century of experience of finance in the Middle East.

here are we based?

From Dubai, Wardley are ideally placed to cover a wide Middle Eastern area and many customer requirements. The State of Dubai, historical trading centre of the United Arab Emirates, continues to grow in modern commercial scope and as an important financial centre. We are ideally situated to serve customers with interests in the Gulf area and in the Middle East generally.

hat can we do for you?

Wardley are experts in preparing total financial packages for develop-ment projects in the Middle East. These usually involve short or medium term loans, in the currency of your choice. The Bank's contribution often includes feasibility studies, structuring the best finance and security, and locating appropriate sources of funds. We also handle export finance, arrange leasing facilities, provide international issues and supply bank guarantees and tender and performance bonds.

hy should you contact us

Wardley Middle East have an on-the-spot knowledge of local affairs, business and trading procedures, legal requirements and fiscal regulations throughout the Middle East. At Wardley Middle East we pride ourselves on the skills of both our local and international financial experts. Call on us, the merchant bank resident in the Arab world. to see how we can help you.

ARABIA

SAUDI

SAUDI ARABIA'S standing in the Moslem world could hardly be higher than it is today. The success of the king-dom's strategy to become the center of the Islamic movement took its most visible form at the Islamic Conference in Taif in January. Although little was achieved in concrete terms, the political significance of the meeting should not be underestimated.

Saudi television showed the heads of state of every Moslem state, seated on carpets within the Grand Mosque of Mecca, being whinin the chand Mostlet of Metca, both led in prayer by King Khaled in one of the few occasions he has spoken in public. Prob-ably the most unforgettable scene was the king leading presidents, premiets and monarchs in a circumambulation of the Ka'aba - the traditional act of devotion made by every pilgrim to Islam's holiest shrine.

It would be inaccurate to suggest that Islam's resurgence is exclusively or even mainly due to Saudi Arabia's political and economic influence, but assisting the devel-opment of pan-Islamic consciousness is one of the key objectives of the kingdom's devel-

sandi Arabia's standing in the Moslem world has come through a combination of its historic role as the guardian of holy places and its new role as a generous donor to coun-tries with substantial Moslem populations.

Oil Organizations

The central structure in the resurgence of Islamic identity is formed by the two organ-izations grouping oil-producing countries — the Organization for Petroleum Exporting Countries and the Organization for Arab Petroleum Exporting Countries. Although neither concentrates exclusively

on developing an Islamic approach to the

world economic order, they have become ve-hicles for criticism of the industrialized and essentially non-Islamic - world's priorities. OAPEC has been active in establishing companies with commercial activities in the Middle East. They include the Arab Petrolenm Investments Corp., which finances petro-leum projects; the United Arab Shipping Co.; the Arab Maritime Petroleum Co., a rather unsuccessful tanker company, and the. Bahrain-based Arab Shipbuilding & Repair-

yard. Sandi Arabia is a major shareholder in all these organizations. Saudi Arabia is also active in at least 15' significant banking and economic institu-tions founded in the Moslem world. It is the second-largest contributor to the Kuwait-

based Arab Fund for Economic & Social Development, which is modeled on the World Bank, and the biggest backer of the Arab Bank for Economic Development in Africa.

London-Based Bank

The largest aid agency that the kingdom is active in is the Jidda-based Islamic Development Bank (IDB). Founded in 1975 under the anspices of the Islamic Conference Organization, the IDB's objectives are to finance economic and social development both in Islamic countries and in Islamic communities worldwide. The essentially Moslem character of the agency — which is intended to become as important in world economic affairs as the Asian Development Bank - is demonstrated by the fact that loans are in accordance with Islamic law; they are interest-free, and have only low service charges.

Other vehicles for Sandi Arabia's partici-pation in the international economy include the London-based Sandi International Bank, which is 50-percent owned by the Sandi Arabian Monetary Agency, the remainder of the bank's shares being held by Sandi and inter-national commercial banks. In contrast to the IDB, the SIB follows commercial banking criteria and is active in international loan syndications.

Saudi Arabia's bilateral aid efforts are channeled through the Saudi Fund for De-velopment and the Faisal Philanthropic Foundation. The former is particularly active in Pakistan, where it has provided lowcost financing for a number of development projects.

The foundation, created in 1976, is poss bly the largest national aid agency in the world. About 30 percent of its fands are devoted to overseas projects, and a particular emphasis is placed on schemes with Infamic aspects. For example, the foundation created a 10-million-rival (33-million) fund to pay for graduate studies for Moslem students. The foundation has encouraged technical development, and it set up the Geneva-based Al-Dir'iyah Institute for research into alter-

native sources of energy. Sandi Arabia considers that it has a specir. role to play in ethicating Moslem clergy men and practitioners of Islamic law. It has three major Islamic universities. One of the reasons for the huge scale of the new Riyadh university campus project --- which is being built by a U.S.-French consortium -- was Saudi Arabia's plan to accept students from other developing countries, particularly Mosiem ones.

Although government support continues Analough government support counters to be the most important way that Sandi Arabia promotes Islam, the private sector has been showing a greater willingness to in-troduce business methods in accordance will Islamic law. Recent examples include the

Abundant Money Can Also Bring Problems

cial to the LHT CAUDI ARABIA, through its oil wealth, has gained a position and influence in the world that sometimes obscures the fact that it is an enormous developing coun-try, facing many of the same problems as other developing states, but with one headache that is unusual: The kingdom quite simply earns more money than it knows what to do with.

Despite huge expenditures on defense and development projects, as well as prestige ventures, generous aid programs and the like, Saudi leaders just cannot balance the books. Income exceeds expenditure — and, perhaps surpris-ingly, this raises serious problems, Then why does Sandi Arabia go

on producing such a large quantity of oil? Production currently stands at 10.3 million barrels a day, rather than the preferred 8.5 million, and Planning Minister Sheikh Hisham Nazer has said that, even if production were cut to 5 million barrels a day, Saudi Arabia could easily meet its financial commitments for the five-year development plan (1981-1985) set at \$234 billion. In fact, it is doubtful whether Saudi Arabia could afford to cut production as low as 5 million barrels, not for financial reasons, but because many of its new industrial projects depend on exploitation of gas associated with oil, which used to be wastefully flared off. Thus production levels of oil have to be sufficient to yield the required volumes of gas. But on the whole Saudi Arabia does not have to calculate its production levels in scoordance with economic need. Since crude oil prices began to increase dramati-cally in 1979, despite Oil Minister Sheikh Ahmed Zaki Yamani's efforts at moderation, Saudi Arabia's surplus revenues have reached staggering proportions. By the end of the year, the kingdom's foreign assets could be as much as \$150 billion, according to Western The nation's oil policy has been clearly identified in the discussions surrounding the recent Organization of Petroleum Exporting Countries conference. When the Iraci-Iranian border war disrupted those

two countries' oil supplies, Saudi Arabia stepped up production to prevent a drastic shortfall that would have forced prices higher. As world demand has declined in plaints are being taken can be judged from the increasingly ag-gressive statements issued by Saurecent months, Saudi Arabia has maintained the higher level of production, creating — deliberately, according to Sheikh Yamani — a di leaders. Few observers seriously glut on the market to keep prices believe, however, that Saudi Arabia is considering causing an inter-

With its vast reserves, Sandi national crisis by cutting off the Arabia is in a strong position to oil. It is simply not the Saudi way. control the market, especially since it can cut or raise production with-But if production continues at lev-els dictated by the world economy out any impact on its domestic budget. Until now, Sandi Arabia has been willing to play this role, especially after the high price rises of 1973-1974, to prevent undue damage to the Western economic rather than the Saudi economy, what can the regime do to pacify local opinion? system.

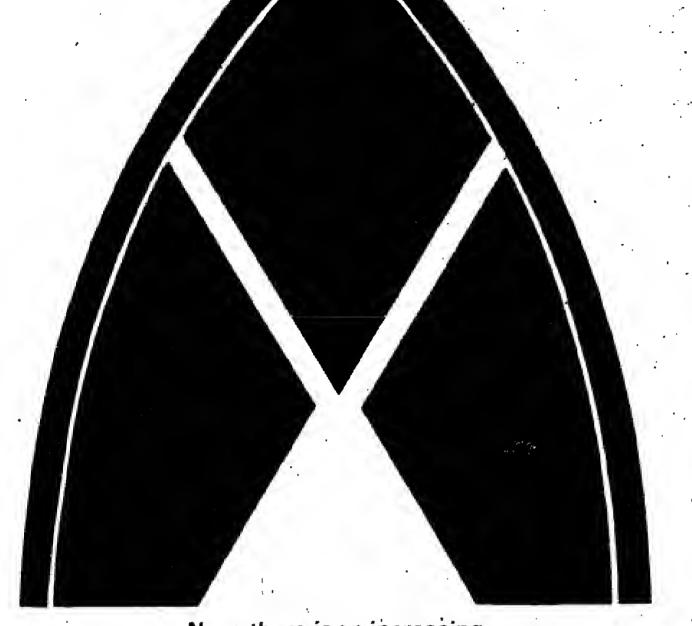

The reasons are straightforward. Saudi leaders see their economic future as interdependent with the West's. In return for all, the West supplies technology, industrial goods and weapons. Moreover, the advanced industrial nations alone kingdom. are capable of absorbing the vast quantities of surplus petrodollars lometers of asphalt-surfaced roads. available for investment, at least in the short term. If the price of oil

many Arabs say that Sandi Arabia should not go on supporting the United States while Washington supports Israel. Just how seriously these com-

benefit from progress created a problem in that the Bedouin and peasants drifted off rural areas into the towns. Agricultural production has been neglected until now, and it will cost a great deal to revitalize it.

Only now is the stage set for a major injection of capital into the industrial projects on which the kingdom's fature is staked, to sllow full exploitation of natural gas and to create spin-off industries that in turn will open a domestic market, without the pressures of international inflation caused by imports.

Sandi leaders have been criticized for developing too slowly. Sandi Arabia is a large country. There are technocrats who argue With a landmass of about 2.2 milthat, since Saudi Arabia provides a lion square kilometers, it is almost high standard of education for its as large as the combined countries of the European Economic Com-munity. Most of this territory is girls and there is a critical shortage of labor, those girls should be aldesert, and while most of the poplowed to use their skills in produculation lives in the major urban areas, there are very small settle-ments scattered throughout the tive jobs, rather than being restricted to socially acceptable functions such as teaching - and nursing. There is also widespread In 1954, there were only 250 kicriticism of the wealth gap that has been created between members of ruling family and a priviles clite and other members of the community.

Now, there is an increasing awareness that Saudi Arabia's social development plans depend upon sophisticated technology available within the Kingdom. Beta plays a key role in providing it. We plan, supply, install and maintain highly advanced telecommunication networks, information and data transmission systems.

Our proven track record of current and past projects include :

- Television Studios
- Microwave Systems
- Satellite Earth Stations
- Border Security Systems
- Digital Telephone Systems
- Coaxial & Optic Fiber Cable Systems
 - Maritime Coastal Radio Systems
 - Airport Security Systems
 - Telex Switching Systems
 - Audio Broadcasting

BETA provides technological know-how and knows how to provide it.

RIYADH- P.O.Box 2824. Tel.477-9088. Telex: 201044 BETACO = JEDDAH - P.O. Box 2011, Tel. 642-4444. Telex: 401170 BETAJD = USA-262 Grand Avenue Oakland, California 94610.Tel.415-839-1270/71.Telex: 337657

continues to rise faster than the seneral rate of inflation, then the increase will be reflected in higher prices of technology and manufactured goods.

Constant Fear

There is a constant fear that, if oil producers become too hawkish. the superpowers might seize the oil fields. But it has always been assumed that Saudi Arabia, in return for its moderation, might reason-ably expect not a quid pro quo but at least a sense of understanding from the United States over the Palestinian and Lebanese crises. This understanding has not come, and indeed the Camp David ac-cords and the freezing out of Egypt by other Arab states were a blow to Sandi Arabia.

The Saudi leadership is under the Sauci leadership is under domestic and regional pressure to cut production for two reasons. First, many young intellectuals and administrators say that the best place for the oil is in the ground until the kingdom is able to absorb the revenues. Second,

centers — Dammam, Riyadh and Jidda — meant building a 1,609-kilometer highway straight across the desert. An entire infrastructure But there are just as many voices criticizing the leadership for devel-oping too quickly and destroying the fabric of this deeply religious, traditional society. That was one of the factors behind the situack in. of roads, airports and essential services like water and electricity has had to be created from scratch. The problem of building the infrastructure was compounded by the fact that little was done before 1979 on the Grand Mosque at Mecca, the holicst place of Islam. Coupled with the revolution in

the mid-1960s. This was true in much of the Gulf region. Before OPEC was formed at the beginning of that decade, oil revenues amounted to less that \$2 a barrel, and the administrative structures necessary for major modernization programs simply did not exist. It was only as OPEC began to make its mark on the oil industry, and as predictions that oil would run out

by the end of the 1980s began to circulate, that attitudes toward de-

velopment changed radically. The first two development plans up to 1980 concentrated largely on infrastructure; without communi-cations, water, electricity and other basic exteriors. basic services, there could be no industrial development. The mevi-table fact that towns were first to

Iran, this gave the Saudi leadership much to think about. The shah, Mohammed Reza Pahlavi, had moved relentlessly to modernize and industrialize his country without much reference to or concern for the people. For Saudi Arabia, the problem of maintaining the balance be twein progress and tradition is complicated by the status of the king as Guardian of the Holy

InturaU.S. Oil Well Saga

High Risk and High Stakes At the Rig on Jackass Bay

By Douglas Martin New York Times Service

ana Sec

72 Se. 21

.

JACKASS BAY, La. - This is the biography of an American oil well, one of the 70,000 that likely will be drilled in the United States this year. It is a story played out every day in places as distinct as the jagged hills of Tennessee, the jackrabbit plains of Texas, the boardrooms of Houston and the : canyons of Wall Street.

By far more oil and gas wells are , drilled in the United States than anywhere else. They are considerably smaller — often one-thousandth the size of the gusters of the Middle East — but they add up to a sizable advantage over countries that produce nooe of their own oil.

The search for oil involves thousands of people far-removed from the ail field roughnecks. It requires the money of businessmen, doctors and depuists; the calculations of tax accountants and the reckoning -: of geologists, engineers and busi-- ness consultants. Most of all, the search depends on the willingness of an independent wildcatter to risk a big loss.

. Jack Koch, 60-year-old gam-Jack . Notes, ou-year of the bler by instinct and oilman by profession, is driving through the Mil ND UNI spongy air of Plaquemines Parish, La. In the calming tones of the country lawyer he is, the rumpled millionaire tries to describe a business where men become rich by ODLE correctly guessing what wealth may lie miles beneath the carth.

Tm Excited

"I thought I'd get over it; but Tm just as excited as I ever was," I'm just as excited as 400 oil and says the driller of some 400 oil and says the differ of some way to Jack-gas wells. He is on the way to Jack-ass Bay — eight miles from the Gulf of Mexico and home of alligators, muskrats, water moccasins hours, tests will tell whether Mr. Kocb's leasing gamble is a winner. Mr. Kocb says he was in the business five years before be drilled a hole that was not dry. Three of his latest efforts have ------- been failures. "This business is a tomorrow business." The next well, always the next well. More than 2.5 million have been

days, egged on by the Reagan ades four months ago, the pace is acyear a record-breaking 62,704 wells were drilled, and so far this year drilling is running 33 percent

abead of even that frantic pace. More wells have been drilled in Kansas than in all of South Amerira, and more all of Africa. And more wells are said to bave been sunk in Plaque-mines Parish — over the years the mines Parish — over the years the most bountiful oil and gas county in the country - than in all of the Arad : Mar Middle East Domestic wells averaging about I6 barrels of production a day, in-Sec. 8 - 2. 2 Saudi Arabian wells, are insurance against foreign snpply disruptions. Clearly, though, Mr. Koch views Jackass Bay more as a business 1.00 - venture than as an exercise in patriotism. "This is a game for grown-ups," he also says. "If you're going to cry about it when you lose, stay away." 16 . 7.4-

making an estimated \$38.6 million over the life of the well. The role played by an independ-ent oilman like Mr. Koch is akin to

that of the producer of a Broadway show. The oilman's script is a piece of land, perhaps under water like Jackass Bay, and a theory about why that land contains oil or

gas. On an average day Mr. Koch receives several phone calls from geologists and others who want to miterest him in a lease. Often he will examine scores of deals before choosing one. "It may be the wrong one, by the way," he said. I'm no oracle."

In the case of Jackass Bay, James P. Evans 3d, an independent geologist, approached Mr. Koch last summer with a lease he

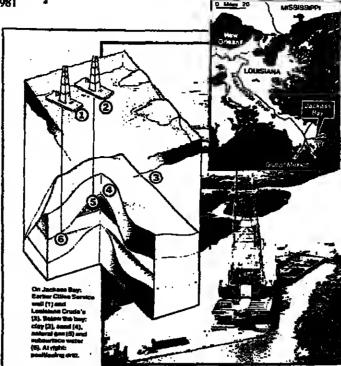

had purchased and a theory about why it was likely to cootain 15 billion cubic feet of natural gas and 36,000 barrels of oil - despite the unpleasant fact that 13 dry holes had been drilled within a threemile radius. Mr. Evans argued that producing well in the area provided evidence that the nearby site he was peddling would also contain bydrocarbons.

Mr. Koch is wary of geological advice. "Nothing makes me run away from a deal faster than a guy wbo says, 'Jack, I got a cinch deal here.' Unless he smiles real fast, I'm gone,"

But now Mr. Koch is in a chlumberger truck that sits on a platform jacked up beside the rig, watching the first logs of electronic

and radioactive tests. Louisiana Crude, a company Mr. Koch beads, bought the lease for \$150,000 on Sept. 10. Then came the money-raising. From extravagant investor parties at the Plaza Hotel in New York City to opulent barbecues on West Texas ranches, oil seeks money, and vice versa, In New Orleans, some oil tycoons reward their mistresses with shares in oil wells, rather than with money or minks.

Money is raised for drilling wells in a dizzying variety of including syndications, forms.

public offerings and private placeand ments. This is no game for those not prepared to lose their investment or who cannot use the tax shelter that drilling programs can provide. Generally, if an investor not in a 50-percent tax bracket

he is playing the wrong game. For the Jackass Bay property, Mr. Koch garnered all but a small fraction of the drilling funds from other independent oilmen. The game is to reduce risk by spreading it as much as possible. "I'd rather bave part of eight wells than 100 percent of one," Mr. Koch said. Louisiana Crude always tries to limit its participation in a drilling venture to a quarter interest at

The custom is for investors to pay one-third of the costs relating their proportion of drilling a 10 particular well, in return for onefourth of the revenue. The company that puts the deal together, in this case Louisiana Crude, gets the revenue from the difference between one-third and one-quarter as

a standard payment. This is partly because the operating company usually has to come up with one-fourth of the costs for completing" and operating a well, if quantities of oil and gas worthy of production are found. Only in the initial drilling, albeit the riskiest part of the operation, does il

For the Fed, the rebellion comes

"It's a very well-designed piece of paper," Donald S. Howard, excutive vice president of Citicorp, said of the Manufacturers Hanover notes, who said be thinks the Fed will allow the issue to be sold.

Despite such bopes, bankers cannot be certain of what the Fed might do. "You never know," Willard C. Butcher, chairman of Chase Manhattan, said.

And grounds exist for apprehension. At a bankers' meeting in Geneva earlier this month, Paul A. Volcker, chairman of the Federal Reserve Board, did oot comment specifically on the Manufacturers Hanover notes, but he said that high-yielding investments offered by banks and bank holding companies "need to be reviewed to see to what extent, if any, these new instruments should be brought under controls."

If the Federal Reserve does oppose the notes, it will further iniand that it must take into considertale the bankers; Manufacturers

Heat Rising in EEC-U.S. Trade Disputes

By Clyde H. Farnsworth New York Times Service

WASHINGTON - The United States and the EEC are trying to deal with a sudden rash of trade disputes erupting from long-running economic problems on both sides of the Ailantic that have sharpened competition for exports and jobs.

A European challenge of the trigger-price mechanism, which regulates the flow of steel imports into the United States; U.S. threats of retaliation if the EEC continues to increase subsidized farm exports, and other skirmishes over textiles, autos and credit subsidies have just been written into the crisis-management agenda of trade officials here and in Europe.

"I think the economic problems

The steel ismite

sales in the U.S. market have failen off sharply in recent months and because their own economies are not strong eoough to absorb their production without substantial

layoffs. While the skirmishing is under way in steel, the Reagan administration has been pressing the EEC to cut back its subsidies to agricultural exports, which help the European farmers undercut prices of U.S. grain and other farm products in world markets. But France's new Socialist president. Francois Mitterrand, campaigned on promises to provide even great support for French farmers, indicating that the United States and France may well be on a collision course in at least this one sector.

Meanwhile, the Europeans are threatening to levy an import tax on U.S. soybean oil, a move that could anger U.S. farmers.

Saudis, Venezuelans Hold Top-Level Talks on Oil

GENEVA - Saudi Arabia and

Venezuela discussed oil prices and the market situation in top-level talks here Sunday, Venezueian Energy Minister Humberto Calderon Berti said. He declined to say whether the

possibility of production cuts had been discussed. Saudi Arabia has declined to join an OPEC majority in cutting production and trying to remove a glut on the world oil market

Thursday of the Organization of Oil Exporting Countries long-term ation the soundness of the entire financial system. strategy committee headed by

The primary, perhaps the exclu-sive, reason for Regulation Q is to protect the thrift industry, savings banks and savings and loan associations. High interest rates have put a good many savings institutions precarious positions. If Regulation Q were eliminated, and all depository institutions had to pay market rates on practically all their funds, the problems of the thrifts would be dangerously compound-

Most thrifts, therefore, oppose rapid casing of Regulation Q, and their case has been championed vigorously by Richard T. Pratt, chairman of the Federal Home Loan Bank Board and a member of Didick.

Bankers argue, however, that the money is flowing out of depository institutions anyway, and that in the process the longer-term interests of the banks are being placed in icopardy.

The next meeting of the deregulation committee, to be held on June 25, is expected to be critical.

Mr. Bailes asked Mr. Schmidt to Mr. Bailes asked with Kinder of suspend the program, Mr. Schmidt said. Mr. Schmidt refused to com-ply immediately. He asked to speak directly with Mr. Volcker. "I spoke with Volcker on the phone and he too just asked me to and he, too, just asked me to suspend the plan," Mr. Schmidt related. But the banker persisted and be arranged to meet with Mr. Volcker in Washington the next day, Friday.

At that meeting, at 3:30 P.M., "I went through a long dissertation of the problems the banking industry is facing," Mr. Schmidt said. "But the Fed still said it wanted us to stop the program. We agreed late Friday night to suspend it until Tuesday, when our board met. After that meeting, we went back and told the Fed that we would raise the minimum initial investment to \$25,000, from the \$10,000 under

the original plan. "The Fed Board met Wednesfunction." Thus, much of the antagonism toward the Fed has been that it has day morning and the chairman called me and said they had not been a strong enough advocate amended the regulations to forfor the banking industry. mally forbid us from going ahead." This concern, which is shared by practically all large banks, has The board resorted to emergency powers and waived the 30-day notice period customarily provided recent weeks following the an-nouncements that Prudential Inbefore changes in regulations are put into effect. The plan, at least for deposits of less than \$100,000,

was dead. The Bank of California went a step further than most other banks, but it was not alone in chal-

lenging the Fed. In February, for example, the Chase Manhattan Bank discovered a loophole under which it could pay up to \$800 in so-called finder's tees for certain deposits. Under the Fed's rules, banks may pay find-er's fees of only \$10 on deposits up to \$5,000, and \$20 on deposits above that amount.

Chase, however, noticed that a small savings bank in the New

Within days after Chase began running large adproposed mergers. vertisements offering the large finder's fees, the Fed reacted and

Aside from the interest-rate question, bankers are frastrated with the slowness of the Federal Reserve (and Congress) to give them the powers they need to compete against the Prudentials and the American Expresses

Banks must be able to compete on a broad name of products," says Richard J. Flamion 3d, president of Security Pacific, Among the powers he would like to have are the ability to underwrite corporate seconities, to act as real estate advisers and brokers, to un-derwrite insurance and act as insurance brokers, and to provide a wide range of investment counseling services.

"The day is long gone," he mid, ticorp's Choice credit card would have been offered lines of credit of when we could eke a good return for shareholders out of a simple. banking business."

> **Treasury Studies** Reagan Tax Plan

New York Thes Service WASHINGTON — The Treas-ury's senior tax official, Norman B. Ture, says the department is re-examining the administration's proposal for business tax relief to one whether it works the test to see whether it might give "substan-tial" subsidies if enacted.

Mr. Ture, the undersecretary for tax and economic policy, was responding to charges by Democrats on the House Ways and Means Committee that the administration's proposal for more liberal depreciation might give a company a saving for a particular asset in excess of the asset's cost.

Mr. Ture said at a news briefing Friday that the administration had no intention of giving cost recov-ery in excess of 100 percent. He ways overshadows its regulatory said the Treasury was making a "rigorous examination" of its proposal to evaluate the complaint. Asked if the Treasury would revise the proposal if it found recovery of more than 100 percent, Mr. Ture said only if the differnce were "substantial," which he refused to been dramatically heightened in

Some themes touched on hy Mr. Mauroy's speech reflected key is- sues and projects which dominated negotiations and discussions among the aerospace industry offi- cials attending the show, which ended Sunday. For example, the prime minister announced that his government would support the A-320 passen- ger airplane heing proposed by Airbus Industrie, a consortium of European and British aerospace companies. Competing projects for planes of the same size, carrying about 150 passengers, were also recently announced by Boeing and the team of McDonnell Douglas and Fokker. Competition Difficult Largely because of the \$2 billion in estimated start-up costs, some of the aerospace companies con- sidering development of the plane predicted that several competing groups could not possibly afford to build differing versions of such a plane and suil make money. "I'm not certain customers can- buy enough new technology. 150- passenger aircraft to support two engine entries and two aircraft en- tries," said Robert J. Carlson, pres- ident of the Pratt & Whitney air- craft engine division of United	<text><text><section-header><text><text><text><text><text><text></text></text></text></text></text></text></section-header></text></text>

66 TT is a fair summary of history," the New York Times": "So indes wrote Justice Felix Frankfurter tible has" the law arising from in 1950, "to say that the safeguards of liberty have frequently been forged in controversies involving not very nice people." This observation is certainly pertiment to the story told in Fred W. Friendly's "Minnesota Rag," a lively account of a landmark U.S. First Amendment case by the well-known teacher, journalist, author, former television-news executive and irrepressible commentator on matters concerning the press and the law.

For the namesake of Near v. Minnesota (1931), Jay M. Near, who died in 1936, was not a very nice person. In fact, Friendly characterizes Near in so many words as a bigot, extortionist many words as a bigot, extortionist and sleazy scandalmonger, whose Minneapolis weekly, The Saturday Press, "practiced a brand of journal-ism that testered on the edge of legali-ty and often toppled over the limits of

propriety." The Minneapolis public officials whom Near attacked in 1927 and who shnt Near's paper down shortly there-after with the so-called Minnesota "gag law" were not very nice p ople. In fact the more Friendly has thought about the case, the more convinced he has become that Near was "90 percent correct" in his newspaper's accusa-tions of criminal neglect of duty on the part of these public officials, though the truth of what Near wrote was never really at issue in the Supreme Court case.

5-to-4 Decision

Even Near's champion and perhaps the ultimate hero of the case, Col. Robert Rutherford (Bertie) McCormick, was not a very nice person. Indeed, Friendly, like a lot of others, had considered the publisher of The

had considered the publisher of the Chicago Tribune a thoroughgoing scoundrel, until he uncarthed McCor-mick's courageous and principled role in backing Near. Yet it was these not very nice peo-ple, along with several curious twists of fate, that led to the gag on Near's paper being appealed to the Supreme Court of the United States. And it was the court's Stord decision in fawas the court's 5-to-4 decision in favor of Near - on the ground, as Chief Justice Charles Evans Hughes wrote in his majority opinion, "that the lib-erty of the press, and of speech, is within the liberty safeguarded by the due process clause of the 14th Amendment from invasion by state action," as well as on the ground that the Minnesota "gag rule" constituted prior restraint - that became the legal cornerstone on which the inviola-bility of the freedom of the American

in the 20th century would be As Friendly concludes in his epi-logue, "From the Saturday Press to

EBTS

CHESS

FTREI

THE pawn has always come in for a lot of maudlin sympathy — which it absolutely does not deserve. You hear about "the lowly pawn" and Just a pawn in the grip of fate," but

in reality the pawn is a monster. Just let a couple of enemy pawns get free in the center and you will have your hands full hurrying your pieces away from their rapacious advance. But, as unsettling as that situation may be, it is still nothing com-pared to the bloodcurdling effect of a brace of opponents' pawns leaning over their seventh rank threatening to

Nowhere is the innate arrogance of the pawn better displayed than in the game between Grandmasters Mignel Quinteros of Argentina and Bent Larsen of Denmark from the Americasvs-Europe match in Mar del Plata. Quinteros brilliantly sacrificed a bishop to set up advanced connected passed pawns, then gave up the ex-change, and, finally a rook down, let his pawns win the game for him.

Against Quinteros's hypermodern opening, it was possible to play 5... P-K5; 6 N-81, N-B3; 7 P-Q3, PxP; 8 PxP, B-K2, but, of coarse, Larsen's 5 . . . N-B3; 6 P-Q3, B-Q3 was unobjectionable. However, after 7 N-R3, it was dubious to play

. . BxN?!; 8 PxB, giving White the bishop-pair and a half open QN file for the sake of creating doubled pawns hard to exploit. Quinteros carried out the typical

hypermodern program of knocking out one of the enemy center pawns with 12 P-K3, PxP; 13 PxP, thus achieving the superior center. After 15. P-Q4, it was already difficult for Black to set up a defense: 15. PxP; 16 PxP, Q-K7; 17 QxQ, RxQ; 18 N-B5 would have conceded the White pieces powerful activity; 15...P-K5 would have produced an overextended, weak KP. Larsen's 15...B-B3; 16 P-Q5, B-R5; 17 P.

K4 allowed the White center to sweep forward with gain of tempo.

Quinteros's 19 Q-N4! forced the re-pair of his queenside pawn formation by 19 ... QxQ; 20 PxQ, the prelude to his attack with 23 P-B5. Soon his 25 P-B6 drove a wedge into the queen-side, augmenting his advantage in . Space

All he needed now was the leverage. to break into the Black position and he found it with 34 P-KN51, RPxP; 35 PxP, P-N4; 36 P-R5, PxP; 37 R-B7. Larsen would have liked to delay this incursion on the KB file, but 36 ... R-KI, for example, could have been defeated by 37 P-N6!, N-B1, 38 R-KN2, QR-B1, 39 B-B5, QR-

"Our man who was there tells

ast-place gullets: But Mark Didtler was the only Burn in the ballpark.

"I can't imagine a summer with-out baseball," he said. "I go to most of the games here and a lot of the games at Comiskey Park, too. It's my way of relaxing between semesters at college. No baseball? It's one of the last things you could count on. What will people do this

summer?" Still, Didtler detected some per-

thetoric about this being a nation-al calamity. He recalled how the television announcer Jack Brickhouse, who scemingly has been openly cheerleading for the Cub-bies since the days of Tinker, Evers and Chance, had noted that sanitation strikes hurt people more than the absence of ball games.

Monologue for Wrigley

But at noon Friday on the North Side of Chicago, the sum-mer loomed bleakly, even though the ivy on the brick walls and the grassy field was lush and green.

"I wonder what Ernie Banks is saying right now," Mark Didtler When Banks was the resident

hero of the North Side, he had a monologue about playing in Wrigley Field. Every Bum can recite it like a church litany: "It's a beautiful day for a ball game here in the

committee. But he knows better

worked their way to a strike.

Baseball Owners Let

Others Do Talking

Iriendly confines of Wrigley Field. The only day game in the major leagues. Let's play two."

Instead of being the site of the only day game Friday. Wrigley Field became the first ballpark his by the strike. The proprietors of the Cubby Bear Inn at Clark and Addison would sell no Cubby Bear Pizza Friday. No red hots at the ballpark. Vendors and ushers and security guards had already left as Mark Didtler soaked up some sun spective on the strike, with little and sighed: "I bet a lot of people will go on unemployment because of this. The players make enough money. They won't be hurt. But I can see their point. too. My father What are they striking about? But the way I see it, the owners are trying to take something away from the players. You can't let people do that."

Under the stands, in a cramped clubhouse befitting the Cubs' sta-tion in the National League, the players were cleaning out their lockers, wearing jeans and sneak-ers and looking like transient young singles moving on to the next town. On this most ragtag

next town. On this most ragtag and insecure team, many of them suffed gear into duffel bags with names like "Springfield" and "Wichita" and "lowa" stenciled on them. Bill Buckner, last year's bat-ting champion, stashed his gear in his old Dodger bag. "Anybody want my itinerary?" asked Mike Tyson, a reserve in-fielder, who wadded next week's travel plans and flipped them into travel plans and flippe:d them into a basket

Busiest Cub

The husiest Cub was Tim Blackwell, a catcher who recently lost his starting position and who a terrible thing, that the clubs are not represented on the hargaining earlier was elected ("railroaded, really") player representative. turning over the responsibilities to some owners.

There are, in fact, some dissident owners who view Grebey as an obstacle to a settlement, but they are not in the majority. On the contrary, a number of clubs have sent Telex messages around the leagues stating their support of the position taken by Grebey and the Player Relations Committee,

directors - Ed Fitzgerald of Milwankee, Clark Griffith of Min-Incsota and Joe Burke of Kansas City from the American League and Dan Galbreath of Pittsburgh Bob Howsam of Cincinnati and John McHale of Montreal from the National League. None of these owners attend negotiating sessions but they meet regularly during negotiations with the bargaining team, which is made up of Grebey, the two league presidents

Who Should Participate?

and three lawyers.

Some players, as well as some of the dissident owners, feel more could be accomplished if at least some owners sat at the bargaining table. Bavasi disagreed. "The owners are constantly told

12130 if they have any suggestions or comments they should get in touch with Ray and the PRC," he said "Having 26 owners in a negotiat-ing room wouldn't work. Miller would have everyone believe this is

Stadler Ahead By a Stroke in Westchester Golf

United Press Interna HARRISON, N.Y. - Craig Stadler sank a four-foot birdie pnt on the final hole for a 3-under par 68 Saturday and took a one-stroke lead over three rivals after the third round of the Westchester Golf Classic.

Stadler, who had started the round a shot behind Gibby Gilbert and Leonard Thompson, was at eight-under 205 with one round to play in quest of the \$72,000 firstprize.

it is Tied at 206 were J.C. Snead, after a 35-foot eagle putt on the final hole for a 67, Tom Kite and Ray Floyd, both with 68.

Gilbert, following a struggling round which included five bogeys, needed an eagle on the final hole to salvage an even-par 71 that put him at 207 along with Ron Streck, who had a 66.

Language **Psychedelic Shrift**

Sol Steinmetz, one of the authors

of The Second Barnhart Diction-

ary of New English, is inclined to

believe him. First, he finds a Hux-

ley coinage unlikely: "Words com-

pounded from 'psyche' normally

appear as 'psycho-,' as m 'psy-

choanalysis, 'psychopathic,' etc. It

seems very unlikely that a linguis-

tic sophisticate like Aldous Huxley

would have coined a word as devi-

ant in form as 'psychedelic'; he

would have instinctively opted for

the lexicographer, "there is an un-

flattering reason for taking Os-

mond at his word. Osmond is

much less of a stickler about his

forms: In his own story of the coinage he refers to 'delis' as a

Greek verb meaning 'to reveal,' whereas the actual form of the

verb is 'deloun,' unless what he

meant was the adjective 'delos,' meaning 'visible or manifest.'

* * *

When a colleague of mine wrote

that Ronald Reagan had "made

the necessary bows to those of

differing views - particularly to minorities who fear short shrift

from his administration," Jim Per-ry of the University of Pennsylva-

nia wanted to know: "Do minori-

ties who fear 'short shrift' fear

"On the other hand," ruminates

the traditional 'psycho-' form.

By William Safire

NEW YORK - A delicatessen in my neighborhood calls itself the "Psyche Delly": such paro-dy is proof that the word "psychedelic" has earned its place in dictionaries. In his book, "Predicting the Past," Dr. Humphrey Osmond, a British-born scientist now working at Bryce Hospital, Tuscaloosa, Ala., re-

counts his creation of the word in the spring of 1956.

In a paper for 🔭 🏝 the New York of to Academy Medicine on mes-caline and LSD, he first thought of "psychotoni-Safi Safire meti

"psychotogen" and "deleriant," but they suggested mimicry of psychoses, and that was not precisely what he had in mind.

He sent a draft of the paper to his friend Aldous Huxley, the author and psychic experimenter, and asked for a suitable word. "By return post came a beautiful word," recalls Dr. Osmond. recalls Dr. Osmond, 'phanerothyme.' Its roots are phaneroin, a Greek word meaning to reveal,' and thumos, 'the Huxley included a little soul.' " rhyme:

To make this mundane world sublime

Take half a gram of phanerothyme.

The suggested word did not transport Osmond. "I had at hand a little Latin dictionary for medical use that had some Greek words in it. It seemed to me that 'psyche' should be part of the word. The 'thumos' may not be revealed, but the psyche is certainly altered. I wanted a neutral word that would suggest transcendence in some splendid way. I found 'delis' -- 'to reveal.' I put the pair together and

came up with 'psychedelic.' " He then wrote back to Huxley with his concoction and included an answering rhyme:

To fall in Hell or soar angelic You'll need a pinch of psychedelic.

A year after Osmond coined the word, Huxley used it; a decade later, as the bad trips on LSD became widely known, Huxley was assumed to be the originator.

Guards: The Discreet Charm Olf Arms and the Woman

By Georgia Dullea Ne. . York Times Service

NEW YORK - A wealthy Euro pearly businessman arrives at K enniedy International Airport, where he is warmly greeted by a fashionable young woman. Lin aking arms, the pair disappear into a waiting limousine th at darries them to the Regency H otell. What is the woman's rela tionship to the businessman? 1) wife; 2) girlfriend;

3) secretary; 41) Loodyguard. This is a typic al assignment for a female b oclyguard at the Holmes Dete ctive Bureau, according to Stev ve Tavlin, its director of operations. Of the 30 armed guards working there, 10 are women whi i are paid to protect a variety of security-con-scious clients - - business executives, show bu siness celebrities and foreign vi sitors and their families.

The typical i temale guard at Holmes is a me sonlighting New York City polic e officer in her 30s. She packs : 1.38-caliber re-volver in a holster strapped either to her chest, and the or hip, depending on what she is wearing. What she is wearing in turn depends on where sh e is going — a tailored suit for a stockholders' meeting, jeans for a jog in the park, a lamé dress f or the disco.

"Physically, a t'emale body-guard is not as much of a deterrent," Tavin conce des, "but she may be a better ob server or she may be better with : a firearm. Bees, some clients would rather not be seen with the : big bouncer type of bodygnard."

The Machine Guns'

The bouncer type of bodyguard is much in evidence. Alarmed by assassir lations, kidnappings, murders and mug-gings, a number of n Stables have taken to arriving at dinner parties with burly guards, sometimes to the dismay of housesses such as Jaquine Lachman. "What really bothers me are the machine guns," says the widow / of Charles Lachman, a founder of Revion. Mostly, the guards are male. But judging by a check of a doz-

en protection agencies in Manhattan, calls for fer tale guards are increasing. Some callers prefer women because off the nature

of the job - escorting the children of the rich to and from school, for example. Others feel that women blend in more easily in social settings.

Before the age of affirmative action, a protection agency would have been hard-pressed to come up with a qualified female bodyguard. Now the agencies have a pool of highly trained women with police and military experience on which to draw.

21 Women in Secret Service

The federal government led the way 10 years ago when a pioneering group of five women became Secret Service agents. Today, 21 of the 1,535 Secret Service agents are women, including one who recently escorted former President Richard M. Nixon to funeral services for John A. Roosevelt Female Secret Service agents,

like males, tend to wear raincoats, business suits, dark glasses and stoic expressions, and carry tiny radios. Trained in the use of several kinds of weapons, they carry a .357-Magnum revolver. "A woman who is used to carrying a whole array of cosmetics in her pocketbook doesn't even notice it after a while," says Laurie Davis, a former Washington police officer and one of the first women to join the Secret Service. Special Agent Davis, 33, now a public information officer, was

once assigned to cover Vice Pres-ident Spiro T. Agnew. An agent's sex has nothing to do with his or her tour of duty, she says. "Just because it's a female agent does not mean she going to be as-signed to cover the first lady." The same is true in the world

of private bodyguards. The John C. Mandel Security Bureau once sent a karate-trained female to protect a former Olympic male wrestling champion rendered temporarily defenseless by a racing car accident. Other protection agencies routinely use male-female escort teams. "Occasionalty, a male client will complain that he doesn't want a female on the job," says William Rowland of Metropolitan International Investigative and Security Services.

On the other hand, female clients often prefer female guards, according to several female

New York City police officers, refused to be identified because, they said, they did not want the subjects of past arrests to know where to find them. They also expressed concern about publicizing the fact that police officers

moonlight.) One guard said that there were places women go where a man could not or would not fit in -dressing rooms, beauty salons, restrooms. Describing her job as part protection, part deception, she said that she often tried to pass herself off as the wife, girl-

friend, secretary --- anything but what she is. She said she might walk with her arm through a man's, or she might, to throw people off, give him a moonish look in a restaurant. But he would be made aware beforehand that this was part of the act. Men sometimes forget this, she

said, and occasionally make passes. She reminds them that she does not mix business with pleasure. If they persist, she tells them she will drop the case. Although some female guards said they had polled their guns

while protecting a charge, none had fired them. A typical comment was, "If force is required, I may use the martial arts. If I see a weapon coming out, I pull my gun and yell, 'Freeze!' That al-ways shocks them." Her ability to shock is a wom-

an's secret weapon, it seems. Qualifications

What does the Holmes agency look for in a woman? Rouse's idea of a perfect bodyguard is someone who is both a trained observer and a skilled marksman. She is also assertive enough to prevent her subject from moving into potentially dangerous situations, yet discreet enough not to call attention to herself.

"We want her to be street smart," he said. "You can sit in a classroom and be told what a bad guy looks like, but until you're in the street for a period of time, you don't really know."

Not that Rouse and others in the business place no value on education. "We look for at least a high school diploma, college better yet. We want to leave a good impression with the client, so we like someone with a little class, someone who can talk a decent conversation. If you're cating in a fancy restaurant and the guy says 'Geeze, the market went down,' or the lady says, 'Hemlines on dresses are going up,' you can't just sit there and say, 'Anybody goes for your jewels, Fil punch 'em in the nose.'"

A former French beauty queen, Suzame Angly, has been sen-tenced to four years in prison, two of them suspended, as an accomplice in the \$360,000 holdup of a customs office in October, 1980, according to court officials in Mulhouse, France. Angly, who was Miss France of 1969, was charged with having driven the getaway car. She has already spent eight months in jail and will remain in prison 16 months more. The two men also convicted in the robbery, Patrick Scheffel and Reinhard Planinz, were sentenced to 18 years and 15 years in prison, respective-

ly. * * *

Only hours after word got out that Richard M. Nixon and his wife, Pat, were buying a modern \$1-million house in New Jersey. the Nixons decided they would give up their town house in Manhattan. Nicholas Ruwe, an aide to: the former president who is handling the purchase of the house in Saddle River, N.J., said the couple will sell their house at 142 East 65th St. in New York. Ruwe said the Nixons, who paid \$750,000 for. the 12-room town house in 1979 and moved into it early in 1980, had not yet decided on a price for the property. Nixon will keep his suite of offices at 26 Federal Plaza in Manhattan, which is about a 50minute drive from the Saddle River house, Ruwe said. The former president has a staff of six in Man-
